

dryspin® lead screw technology

dryspin® injection-moulded cylindrical lead screw nuts with machined thread**Injection-moulded lead screw nuts**

The new dryspin® injection moulding lead screw nuts in cylindrical design, with flange or with spanner flat, ensure quiet operation due to tighter manufacturing tolerances and rounded tooth geometries. No grease or oil in the lead screw drive.

- Cost-effective production with injection moulding
- Up to 25% less wear compared to POM+PTFE (dimensions 10X3)
