QuickRobot

The complete online equipment tool for robots

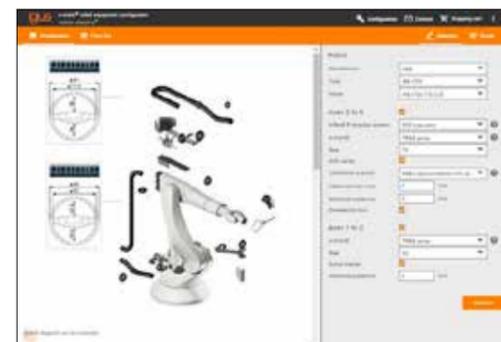

Energy supply for robots made easy online: around 1.5 million configuration options for energy supply components on a robot

Thanks to this selection tool for robot equipment, a complete system including cable guide systems can be specified from the available robot types. One can select either a full system or a system for an individual axis.

- Choose your robot from a multitude of models supplied by well-known manufacturers
- Provides a full parts list, total price and expected delivery time for your configuration
- Easy transfer to shopping cart, complete configuration or individual parts, no minimum order quantity
- Save, download or reset your individual configuration
- Creation of PDF report for your configuration
- Also suitable for iPad

motion? plastics!
Tech up, Cost down ...

... and always at least one of these: that is the goal of all igus® products. Other benefits are the fast delivery time, from 24hrs until shipping, plus the service life calculation for nearly all product lines. We will be happy to send you free sample parts for your testing and prototypes. Tested and proven service life. Available immediately with online service life calculation.

Available from stock. Ready to ship in 24 - 48hrs.
The delivery times indicated are the average time until the ordered goods are dispatched.

No minimum order value. No surcharges.
No minimum order value with igus®.

Multi-axis energy chains for robots

The screenshot shows the igus website interface. At the top, there's a search bar and navigation links. The main content area features a large banner for a "Configurator for robotic equipment" with a "Configure now" button. Below this, there's a section for "Multi-axis e-chain® for robots - triflex® R" with a detailed description of its benefits in 3D applications. Further down, there are several call-to-action boxes: "Product overview" with a shopping cart icon, "Consultation + upload function" with an information icon, "2 configurators" with a robot image, "Innovations from 2021 and 2020" with a "New" icon, and "10 tips for energy supply on the robot" with a document icon. A QR code is located on the right side of the page.

Tech up. Cost down.

Dear customer,

The modular igus® robot equipment kit comprises well over 10,000 different items. We can offer you an optimised solution for almost every robot. With a wide variety of accessories, the triflex® R energy chain system can be adapted to many applications and the most varied movements of your robot.

Our online "robot equipment configurator" enables you to create the right configuration according to your specifications in just a few seconds. The configurator gives you a visual representation of the products on the robot and a parts list - try it for yourself ► www.igus.de/quickrobot.

All igus® robotic components are tested in our laboratory and have already been used reliably in many applications for many years. Our goal is to ensure that the whole energy supply on your robots is reliable. We do not simply focus on mechanical protection but instead look at the entire application including the cables that have also been especially developed for use on the robot. We will gladly find a solution for your application and look forward to receiving your enquiry. We are always happy to visit you on site and show you the advantages of the modular igus® robot equipment kit. Please contact us.

It's our job.

Tested.

We operate the largest test laboratory in the industry for you - 10 billion test cycles per year in the laboratory for energy chains and chainflex® cables (as of 04/2022)

Are e-chains® correct for your application? You don't need to guess. Instead, we operate the largest test laboratory in the industry on an area of 3,800 square metres. We test energy chain systems there under the realistic conditions. 180 test stations perform over ten billion test cycles with e-chains® and chainflex® cables every year.

We use the results to develop the optimum energy supply system for any application and to make reliable statements about service life. Regardless of whether your application is in the dusty desert or freezing cold. For this reason, we also offer you an above-average guarantee of up to 36 months - as the only supplier worldwide to do so (as of 04/2022).

IPA-certified in-house cleanroom laboratory

Cable test, more than 80 million strokes

Bend factor test, 76 million strokes at 9.4 x d

Outdoor test facility for travel lengths of up to 400m

Swarf test, 100% swarf-resistant

Test for torsion and twisting

3,800m² igus® lab. It is the largest test lab in the energy chain industry with 65 e-chain® test machines and about 7,515 test results per year

► www.igus.eu/testlab

Guaranteed.

Up to 36 months e-chain® guarantee* - use the service life calculator to determine the guaranteed service life and receive your individual guarantee certificate online

The service life of e-chains® often exceeds 10 years. The new guarantee service gives customers the confidence of being able to design their individual application right and always choose the most cost-effective e-chain® that works reliably.

- Up to 36 months guarantee* on all e-chain® components that have failed due to wear and tear
- Generate individual guarantee certificate via the igus® e-chain® service life calculator and have it sent by e-mail
- Free replacement parts for e-chains® that fail due to wear and tear
- The chainflex® cables used in the e-chain® also come with up to 36 months guarantee

▶ Quickly harnessed ...

▶ ... quickly delivered ...

▶ ... with an up to 36-month guarantee*!

▶ www.igus.eu/ECS-service-life

Guarantee information*

The igus® e-chain® guarantee of up to 36 months applies to the number of double strokes according to the online service life calculator (www.igus.eu/info/energy-chains-service-life-calculator). The guarantee conditions available at ▶ www.igus.eu/e-chain-guarantee apply.

The igus® chainflex® guarantee of up to 36 months is valid for the number of double strokes calculated according to the online service life calculator (www.igus.eu/ChainflexTools/ServiceLifeCalculator). The guarantee conditions available at ▶ www.igus.eu/guarantee apply.

Recycling.

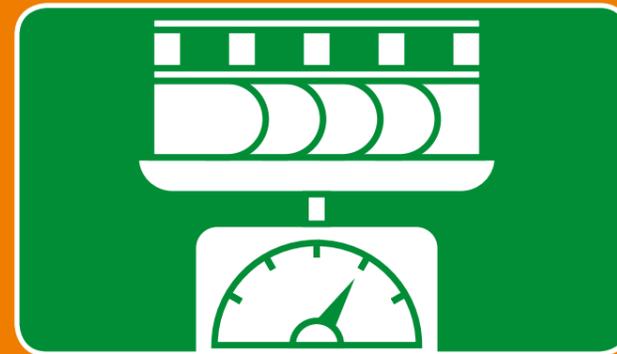

Let's protect the environment together! We can recycle old energy chains, irrespective of their manufacturer

CO₂ emissions in the industry are driving climate change. Industry must take responsibility to counteract this development. We have therefore launched the **change** recycling program.

Send us your old energy chains instead of simply disposing of them with industrial waste. We will separate the material into its constituent materials and shred it. We use the granulate of igus® energy chains for moulding new products. We turn the recycled material from competitors' chains over to circular economy exchanges. Of course, the program is also rewarding for you. We compensate your commitment with a voucher for new igus® products.

1. Clean

2. Weigh

3. Fill out the form

4. Pack

5. You will receive a voucher that you can then use for new igus® products

Our environmental management is certified according to DQS ISO 14001:2015

the change
the igus' green change recycling program

Fast delivery.

Our supply chain pushes the accelerator for you

We guarantee fast delivery worldwide - with 4,600 employees in Germany and at 30 international subsidiaries as well as offices and support points in more than 80 countries. 97% of the catalogue parts are immediately available. Your order will be ready to ship within 24-48 hours - even sooner if you wish. You can conveniently track the shipment online.

And best of all: there are no surcharges for small quantities, no cutting charges for cables and no packaging costs.

Shipped from 24hrs

No minimum order quantity

7-20 plus Saturday service

Online order tracking

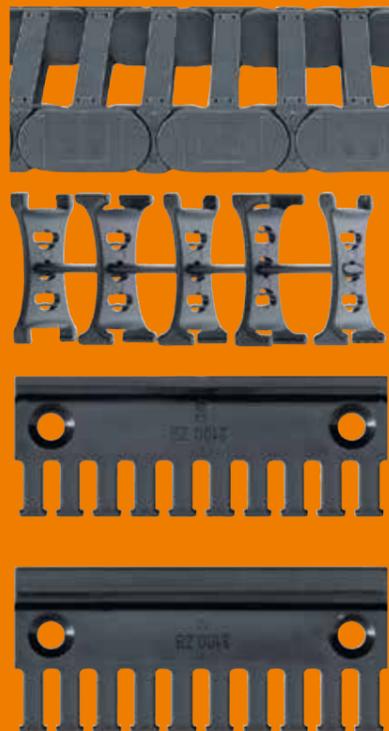

► www.igus.eu/24hrs

24hrs

Single components e.g.

A single e-chain® link, 6m of e-chain®, 3 strain relief elements, etc.

24-72hrs

Customised e-chain systems® e.g.

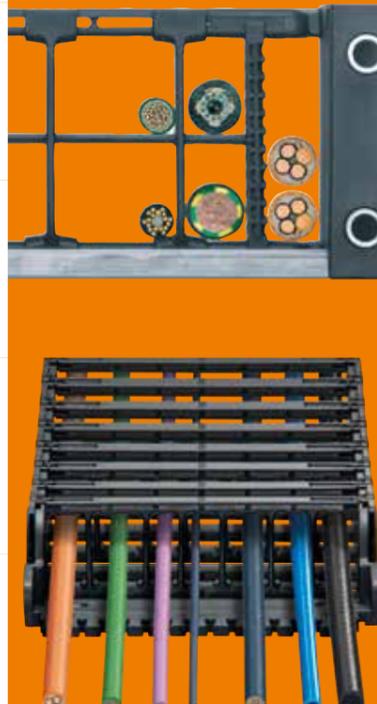

11.46m of igus® e-chains® with interior separators, mounting brackets and strain relief elements according to your specifications. Also with loose accessories as chainflex® cables, guide troughs, mounting brackets, strain relief and installation materials

3-5 business days

Harnessed systems, e.g. readychain® basic

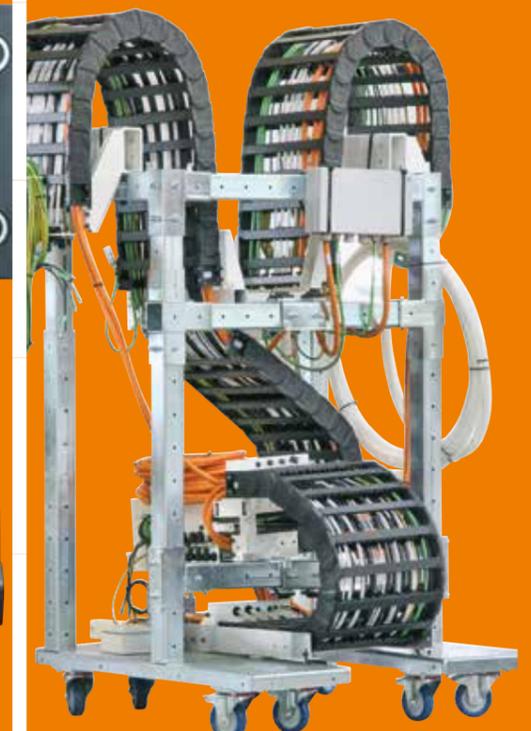

Simple, harnessed e-chain systems® including installed cables without connectors, labelled and tail lengths to your specifications

10 business days

readychain® premium

Fully harnessed igus® e-chain system® with cables of all types as well as plug connections, connectors, projections and components according to your specifications

Quality.

The igus® factory - investment in better technology and faster delivery times

A few decades ago, it was unthinkable to replace metal with plastic in the production of energy chains. But that is precisely the secret of our success. We have pushed the boundaries of plastic technology a lot further. And at the same time, costs are being reduced all the time. 200,000 customers worldwide trust "motion plastics". We will continue on our growth trend and, with all innovations and investments, we will focus more than ever on sophisticated yet simple solutions.

Applications.

triflex® R for robot applications

triflex® R (R for "round") is the third generation of multi-axis igus® energy chains. The multi-axis energy supply system triflex® R was specially developed for sophisticated 6-axis robotic applications in harsh industrial environments. Some of the important design features are: fibre-rod option for the partial reinforcement of the triflex® R, approximately +/- 10° torsion per link, high tensile strength through ball and socket joint. More than 100 components are available in the triflex® R product range, covering all requirements from large welding robots down to small palletising robots. triflex® R has received the iF Design award.

Typical industries and applications:

- The first choice for multi-axis robots
- Machine tools
- Handling machines - 6-axis
- Material handling
- General mechanical engineering
- And much more

Closely routed on the robot arm without looping

For tough, dirty applications

triflex® R in storage and retrieval system

triflex® TRL - easy and quick cable removal

triflex® R on axis 1-6, E4.1 on axis 7 of the robot

triflex® R on a robot arm

Production plant of plastic vehicle tanks. The igus® RSP systems prevent loop formation of the e-chains® in the working area.

► www.igus.eu/robotics-applications

igus[®] 3D e-chains[®]

For robots and
multi-axis movements

For multi-axis movements and robots - triflex® R

triflex® R (R for "round") is the third generation of multi-axis igus® e-chains®. The key design characteristics of igus® triflex® R have made this product very successful in the robot industry.

- Defined torsion stop-dog on each e-chain® link
- Defined minimum bend radius
- High tensile strength due to ball and socket joint
- Compact retraction system options to prevent loop formation
- Fibre-rod option for partial directional control and reinforcement
- No extra support elements required, e.g. steel cables, spring suspensions
- Wide range of accessories

triflex® R available in 5 versions from stock

- TRC closed design with smooth and robust exterior
- TRE "easy" design, easy to fill from outside
- TRCF closed design with snap-lock mechanism
- TRL very lightweight, with "easy" design
- TRLF light version with snap-lock mechanism

Typical industries and applications

- The first choice for multi-axis robots
- Machine tools
- Handling machines - 6-axis
- Material handling
- Packaging machines
- General machinery, etc.

 Assembly video available online at
▶ www.igus.eu/triflexR_assembly

 Available from stock. Ready to ship in 24 - 48hrs.*
*Average time before the ordered goods are dispatched.

The defined torsion stop ensures an even distribution of the torsional load across the entire length

A tough, bend radius stop-dog actively prevents cables and hoses from kinking

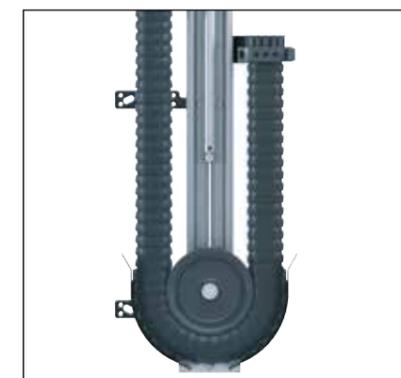

Interior separation: two or three chamber design for reliable cable guidance

Openable - series TRCF and TRLF have snap-lock mechanism for easy filling

Tensile strength is absorbed directly by the e-chain® - no additional supports are necessary

4 retraction system options available to prevent formation of loops in the robot's working area

Standard and light mounting brackets available with or without integrated strain relief. Some versions available in ESD material, from stock

Mounting brackets options with gliding feed-through and swivel bearing. Bearing with a maintenance-free igubal® ball and socket joint

Various heavy duty and compact connections and quick-change units are available

 Serie TRC - electrically conductive
ESD e-chains® - several series available from stock

 UL94-V2 classification

 iF product design award
2004 for igus® series TRC
2007 for igus® series TRL
2013 for igus® series TRLF

TRCF.85	MAT0050170
TRCF.100	MAT0050172

Applications

igus® triflex® R TRLF - light version, easily openable by hand or with a screwdriver

igus® triflex® R TRCF - closed version, openable with a screwdriver

triflex® RS for a low profile retraction system. Integrated fibre rods generate the directed pretension so that loops do not form in the working area

Pneumatic retraction system triflex® RSP - prevents loop forming on the robot

triflex® TR.RSE.40.L or R, cost-effective and lightweight retraction system with deflection roller, for small robots

TR.RSE linear retraction system for triflex® R, sizes 40-125

triflex® R TRC

TRC - enclosed, chip-repellent design

High tensile strength thanks to special ball and socket design

Defined torsion stop, allows free movement in any direction but still protects the cables

Impact-resistant, abrasion resistant and dirt-resistant

Easy assembly and disassembly

High strength - thanks to external stop-dogs

Small bend radii and short pitch

Easy attachment and special accessories for the robot or machine

Closed and chip-repellent - TRC

- Secure, closed and chip-repellent energy supply for multi-axis movements
- Smooth, robust exterior avoids snagging
- High torsion resistance
- Easy to lengthen and shorten

Typical industries and applications

- Robotics and automation
- Multi-axis machine tools
- Wet and cold cells
- Painting applications and ESD
- Sand and dust exposure

 Electrically conductive ESD e-chains® - several series available from stock

 **iF product design award**
2004 igus® series TRC

 Available from stock. Ready to ship in 24 - 48hrs.*
*Average time before the ordered goods are dispatched.

triflex® R TRE

TRE - "easy" design - simply press cables in

High tensile strength thanks to special ball and socket design

Defined torsion stop, allows free movement in any direction but still protects the cables

"Easy" design for fast filling with cables and hoses

Simple tool for fast disassembly of the triflex® B versions

High strength - thanks to external stop-dogs

Small bend radii and short pitch

Easy attachment and special accessories for the robot or machine

Easy to fill - simply press cables in - TRE

- Easy to fill energy supply for multi-axis movements
- High torsion resistance
- Easy to lengthen and shorten
- **B version** - 4x increase in radial stability, allows larger torsion forces
- **C version and TRE.125** - fast assembly due to pin connection and spherical igubal® joint allowing 50% higher tensile forces

Typical industries and applications

- Robotics and automation
- Spot welding and pick and place applications
- When fast cable replacement is required

 Electrically conductive ESD e-chains® upon request

 Save time - easy disassembly tool available for triflex® R

 TRE - very easy to fill, cables are simply pushed in

 Available from stock. Ready to ship in 24 - 48hrs.*
*Average time before the ordered goods are dispatched.

triflex® R TRCF

TRCF - enclosed design with snap-lock mechanism

High tensile strength thanks to special ball and socket design

Defined torsion stop, allows free movement in any direction but still protects the cables

Easy to open for large, stiff hoses or many cables

Easy assembly and disassembly - 4-piece, with openable lids

Impact-resistant and dirt-resistant

3-chamber design for interior separation

Small bend radii and short pitch

Mounting bracket with strain relief also available as intermediate bracket

Enclosed design with snap-lock mechanism - TRCF

- Snap-lock mechanism for fast opening to insert large cables or hoses
- Snap lock mechanism openable with a screwdriver
- Defined minimum bend radius and torsion stop-dog for optimum cable protection
- Enclosed version, for use with dirt and chip exposure
- 3 chamber design for ideal cable distribution and separation
- Easy to lengthen and shorten

Typical industries and applications

- Robotics and automation
- Painting applications
- Large hydraulic hoses
- Screw and rivet feeds
- Tool changer applications
- Robot for laser welding
- Robot for screw and rivet applications

 Save time - easy disassembly tool available for triflex® R

Flip open, insert cable, and close snap lock mechanism - then ready to run!

Available from stock. Ready to ship in 24 - 48hrs.*

*Average time before the ordered goods are dispatched.

triflex® R TRL

TRL - light and cost-effective with "easy" design

High tensile strength thanks to special ball and socket design

Defined torsion stop, allows free movement in any direction but still protects the cables

"Easy" design for fast filling with cables and hoses

Easy assembly and disassembly

Extremely lightweight due to one-piece design

Small bend radii and short pitch

Mounting bracket with strain relief also available as intermediate bracket

Lightweight and cost-effective - TRL

- Very easy to fill
- Multi-axis e-chain® for simple applications
- Easy to lengthen and shorten

Typical industries and applications

- Robot axes 1-3
- Non-robotic applications
- Bundling cables for operator controls
- Filament feeds on 3D printers
- Office applications

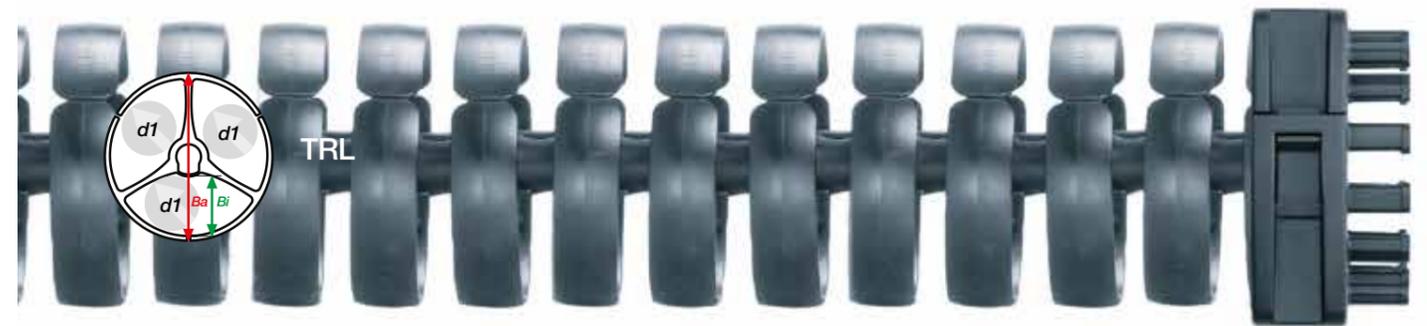

Available from stock. Ready to ship in 24 - 48hrs.*
*Average time before the ordered goods are dispatched.

chainfix clamps

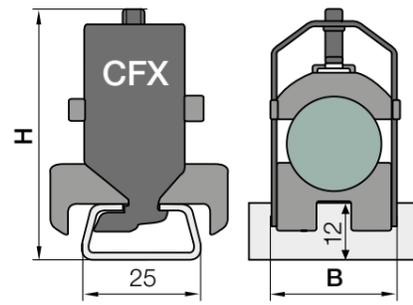

chainfix | Single clamp incl. bottom saddles

- For use with heavy-duty connection **TR.XX.20 / TR.XX.23** and quick release unit **TR.XX.22**
- Reliably absorbs tensile forces even for larger cable diameters
- Specifically recommended for solid welding cables and rigid hydraulic hoses
- Space- and time-saving assembly onto the C-profile
- Simple assembly with threaded pins screwed with an Allen wrench
- Durability for dynamic applications with improved stacker elements
- Integrated ribs on the stacker elements prevent the cables from coming loose from the strain relief
- Steel (material galvanised steel) or stainless steel (material 1.4301/AISI 304) available

Pneumatic stacker saddles | For CFX and CFXL clamps

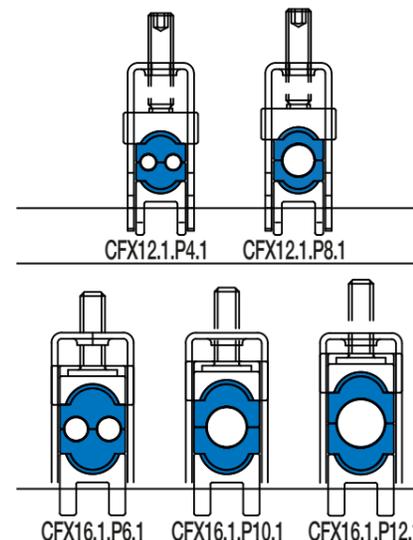

- Strain relief of pneumatic hoses without crushing or damage
- For pneumatic hose diameters of 4mm, 6mm, 8mm, 10mm and 12mm
- High holding force due to "all-round" grip
- The cross section of pneumatic hoses is fully retained
- No crushing of the hoses, and therefore no loss of hose length
- Coloured identification markings, inserts are blue
- Fast assembly without checking the tightening torque

triflex® R accessories

Cobot universal mounting brackets

Fast assembly:
assembled or retrofitted
in just a few steps

Various options:
available in
four versions

Silicone-free:
suitable for
automotive industry

Flexible:
hook-and-loop strip
adapt to any robot arm

Cost-effective, flexible and fast assembly - triflex® COB universal mounting brackets

For secure attachment of e-chains® or protective hoses to robots, users can now rely on the new Lean Robotics brackets from igus®. The universal mounting brackets with hook-and-loop strips are flexible and adapt to any robot arm. A slim design with rounded edges reduces the risk of injury if there is contact with the robot. The new Lean Robotics brackets are available in various designs and are suitable for use with the triflex® R TRC/TRE/TRL 30 and 40 series and for all commercially available protective hoses in various diameters.

- Compact, lightweight and smooth design
- For different robots arm diameters, universal applications
- Assembled and retrofitted in just a few steps
- Silicone-free, suitable for automotive industry
- Virtually no edges, so the risk of injury is minimised
- The standard universal mounting brackets ❶ are suitable for all sizes of the triflex® R e-chain® series TRC/TRE/TRL
- The standard universal mounting brackets with hook-and-loop strips and protector ❷ or mounting bracket ❸ are suitable for triflex® R e-chain® series TRC/TRE/TRL 30 and 40
- The standard universal mounting brackets with PMA Clip ❹ are suitable for nominal widths 17, 23, 29, 36 and 48mm
- Low-cost addition to the igus® cobot accessories range

triflex® R accessories

Cobot universal mounting brackets overview

❶ Standard for maximum adaptability

⊕ **Benefits:**

- 1 x polymer bracket
- 1m hook-and-loop strip
- Most cost-effective clamp in the range
- Silicone-free
- Maximum freedom for cable management

Suitable for:
triflex® R e-chain® series TRC/TRE/TRL

► Page 58

❷ With triflex® R protector

⊕ **Benefits:**

- 1 x polymer bracket
- 1m hook-and-loop strip
- 1 x round protector size 40
- Silicone-free

Suitable for:
triflex® R e-chain® series TRC/TRE/TRL, size 40

► Page 58

❸ With triflex® R mounting bracket and optional strain relief

⊕ **Benefits:**

- 1 x polymer bracket
- 1m hook-and-loop strip
- 1 x lightweight mounting bracket size 30 or 40*, available with and without strain relief
- *Size 40, option with long or short strain relief teeth
- Silicone-free

Suitable for:
triflex® R e-chain® series TRC/TRE/TRL, size 30 and 40

► Page 58

❹ With PMA clip

⊕ **Benefits:**

- 1 x polymer bracket
- 1m hook-and-loop strip
- 1 x PMA clip
- Available in 5 sizes for corrugated hoses
- Silicone-free

Suitable for:
Corrugated tube systems with nominal width 17, 23, 29, 36 and 48mm

triflex® R accessories

Cobot cable clip **New**

Single cables and hoses are attached with cable tie-wrap

Attach single cables and hoses bending the supplied hook-and-loop strip

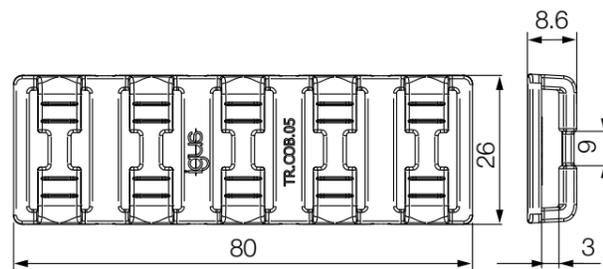

Quick, easy and universal cable attachment - triflex® COB cable clip

Cable clip for fast, easy attachment of cables and hoses to cobots or small robots. Made of flexible plastic, the cable clip adapts to any arm diameter of a cobot, robot or object. A silicone-free hook-and-loop strip is used for optimal attachment, which can be selected in 500mm and 1,000mm lengths and can be easily shortened with scissors.

- Compact, lightweight design
- For different robots arm diameters, universal applications
- Assembled and retrofitted in just a few steps
- Silicone-free, suitable for automotive industry
- Virtually no edges, so the risk of injury is minimised
- Cost-effective
- Space-saving by shortening the brackets
- Alternative to fastening with just cable ties

triflex® R accessories

Fibre-rod bracket for Universal Robots

Installation in minutes

Less downtime, maintenance-free

Easy to retrofit

UNIVERSAL ROBOTS
For UR5, UR5e, UR10, UR10e

Additional flexibility when routing the cables for Universal Robots - Bracket for fibre-rod system

The igus® bracket for the triflex® R fibre-rod system of sizes 30 and 40 enables virtually contact-free management of cables on Universal Robots.

- Easy retrofitting of cables and hoses
- Strong, defined cable management up to the tool
- Can be combined with our cobot mounting brackets
- Plug and play for UR10 + UR10e
- Minimisation of looping by holding the e-chain® above the axis 4-6
- Elongated holes allow custom, infinite fibre-rod module adjustment
- Get a complete solution in just 8 clicks using our online tool ► www.igus.eu/quickrobot

triflex® R accessories

UR metal mounting brackets

Mounting brackets for "Universal Robots" - UR brackets

The "Universal Robots" company makes easy-to-use, lightweight robot systems. The triflex® R 30 and 40 sizes are a perfect fit for UR3, UR5, UR10, UR3e, UR5e, UR10e and UR16e robot systems, both technically and aesthetically. Connecting the system is quick and easy when using the UR brackets.

- Safe cable management with triflex® R for "universal robots"
- Easy connection with screw clips
- For TRC, TRE, TRL: Ø 30 and 40mm
- Suitable for PMA corrugated tube I-PIST-29B (optional)

SCARA Cable Solution (SCS) **New**

Modular system,
easy to retrofit

Safe guidance of
cables and hoses

The e-rib is clipped onto the corrugated
tube and stabilises it in such a way
that it can only move in one direction

Easy maintenance

All components are
individually replaceable

Can be delivered as harnessed system

Custom design for easy adjustment
to different SCARA types

Durable energy supply for SCARA robots

igus® has developed the SCARA Cable Solution (SCS) to route cables safely on SCARAs. The combination of a reinforced corrugated tube with the e-rib and the pivoted connections enables a process-reliable energy supply. The e-rib fills the joints of the corrugated hose to stabilise it in such a way that it can only move in one direction. The pivoted connections can either be attached directly to the ball screw (moving end) or with the help of an M40 screwed connection (fixed end). This solution will be available in nominal width 29 as standard.

- Safe guidance of cables and hoses on SCARA robots
- Quick, simple assembly
- Individually adaptable for different Scara models
- Includes the energy supply system from axis 1 or 2 to the ball screw
- Inner diameter nominal width 29 of the SCARA Cable Solution connection 21mm
- Nominal width 36 available upon request

Product range | Reinforced corrugated tube with pre-assembled e-rib | Nominal width 29

triflex® R retraction systems

For supplying energy to articulated robots

The picture above shows the cost-effective RSEL retraction system

Prevent loop formation on robots - triflex® R retraction systems

The global growth in automation for industrial production is leading to more and more complex robotic applications. Target cycle times are getting shorter and downtime must also be reduced. To provide reliable protection against premature system failure and downtime, we recommend the use of a triflex® R e-chain® especially to bridge the last three axes on robots. The length change that results from the robot's movement is compensated by our triflex® R retraction systems. This constantly guides the igus® e-chain® in a controlled way to prevent the formation of loops in the robot's working area.

5 triflex® R retraction system types available from stock:

- **RS** Modular retraction system
- **RSP** Pneumatic retraction system
- **RSE** Cost-effective retraction system with deflection
- **RSE·RSEC linear** Compact retraction system, linear
- **RSEL·RSSL** Cost-effective retraction system, linear

Typical industries and applications

- Machine tools ● Handling machines - 6-axis ● Conveyor systems ● Packaging machines ● General mechanical engineering, etc.

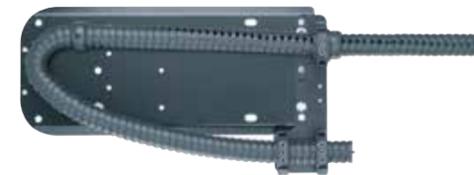

Available from stock. Ready to ship in 24 - 48hrs.*

*Average time before the ordered goods are dispatched.

triflex® R retraction systems

System overview and advantages

RS modular retraction system
► From page 74

⊕ Benefits:

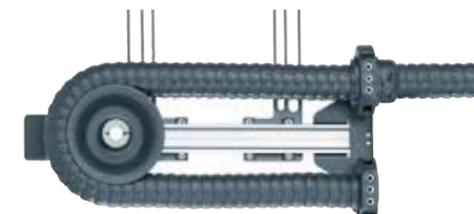

- For use with adverse environmental influences
- Retraction force provided by integrated fibre-rods
- For robots with a load capacity from approx. 10kg
- Up to 670mm retraction length
- If a linear guide system is not needed
- For series TRC·TRE with ø index 40-100mm

RSP pneumatic retraction system
► From page 82

⊕ Benefits:

- Standard pneumatic components
- For a sensor-based monitoring
- For applications with a high fill weight
- Constant force over the complete travel
- For robots with a load capacity of approx. 50kg
- Up to 780mm retraction length
- For series TRC·TRE·TRCF with ø index of 60-125mm

RSE cost-effective retraction system with deflection
► From page 90

⊕ Benefits:

- For small robots, very light
- Up to 500mm retraction length
- For highly dynamic movements
- Cost-effective
- Maintenance-free igus® drylin® W linear unit
- For series TRC·TRE with ø index 40-50mm

RSE·RSEC linear compact retraction system
► From page 98

⊕ Benefits:

- Special linear guide with no small bend radii
- Simple, linear retraction without sags, fibre rods, or guide rollers
- Up to 490mm retraction length
- Space-saving
- Maintenance-free igus® drylin® W linear unit
- For series TRC·TRE·TRCF with ø index 40-100mm

RSEL·RSSL cost-effective retraction system, linear
► From page 108

⊕ Benefits:

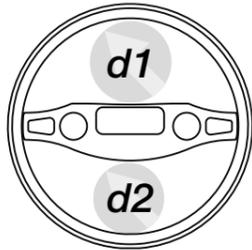

- Linear guidance even for highly dynamic applications
- For robots with high and medium payloads
- Up to 380mm retraction length possible
- Cost-effective
- For series TRC·TRE·TRCF with ø index of 60-100mm

RS retraction system

Modular retraction system

Modular retraction system - triflex® RS

triflex® RS is a retraction system for robots with medium to high payloads. With triflex® RS, the multi-axis triflex® R e-chain® is routed parallel to the robot arm. Integrated fibre rods produce a directed pretension, avoiding the formation of loops in the working area of the robot head. This also allows applications to be implemented in very limited space. triflex® RS offers safe energy supply for tools without stressing the cables, thus minimising downtimes.

- Space-saving, closely routed on the robot arm
- A system solution proven and tested in thousands of applications
- Universal installation
- Integrated fibre-rods - no external mechanical components such as springs or steel cables required.

RSP retraction system

Pneumatic retraction system

Up to 780mm retraction length with TRC, TRE and TRCF e-chains® (please order matching e-chain® separately)

Increased protection against failure by optional end position monitoring

Standard pneumatic components for easy integration

Pressure compensation unit for an adjustable retraction force

Open system, low profile design

Custom connection possibilities using adapter consoles

Double retraction distance relative to the overall length

Pneumatic retraction system - triflex® RSP

triflex® RSP prevents loops on the robot head, with a continuously adjustable retraction force. Extension lengths of up to 780mm enable a secure guidance of the cables and hoses, even with large arm diameters and very complex movements. The retraction forces can be adjusted using a pneumatic cylinder. Whether light or heavy fill weights, long or short robot arms - with the igus® RSP retraction system the retraction force can be adjusted to the individual application.

- For axis 3-6 on industrial robots
- Larger retraction forces than RS system
- Even larger e-chains® up to Ø 125mm can be guided safely
- Almost constant force over the complete travel, even with heavy fill weights
- The end position can be monitored so damage can be prevented
- Mounting options for numerous robot models and manufacturers with adapter consoles
- Very low energy consumption with integrated air reservoir

RSE retraction system

Cost-effective retraction system with deflection

Cost-effective retraction system with deflection for small robots - triflex® RSE

Specially developed for robots with small to medium cable and hose filling, the igus® triflex® RSE retraction system offers a way to prevent loop formation in the workspace of the robot, even in highly dynamic applications.

- For series TRC·TRE with ø index 40 and 50mm
- Extremely fast response, even in highly dynamic robot programs
- Low weight, very little reduction in robot handling capacity
- Universal adjustable installation brackets
- Maintenance and lubrication-free igus® drylin® W linear unit
- For maximum degrees of freedom
- For cable diameters up to 18.8mm

RSE applications

RSE - R(etraction) S(ystem) E(lastic)

Reliable and controlled energy supply, even in confined space with the igus® triflex® RSE retraction system

RSE·RSEC linear

Compact retraction system, linear

Up to 490mm retraction length with triflex® RSE linear

For TRC·TRE·TRCF series with a \varnothing index of 40-100mm (please order matching e-chain® separately)

Simple, linear retraction without sags, fibre rods, or guide rollers

Special linear guide with no small bend radii

Custom connection possibilities using adapter consoles

Maintenance-free igus® drylin® W linear unit

Compact design, no loops

Cost-effective

Compact retraction system - triflex® RSE and RSEC linear

It is increasingly the case that not only electric power and fluids have to be supplied to production robots; but also laser cables and supply hoses for rivets, pins and screws. As these often cannot function with small bend radii, the new triflex® RSE and RSEC relies on very easy linear retraction without loops and spring rods or deflection rollers. The purpose of the triflex® RSE and RSEC retraction system is to hold the e-chain® as closely as possible to the robot arm in order to prevent the e-chain® from intruding upon or blocking the robot's movements.

- Simple, linear retraction without sags, fibre rods, or guide rollers
- For series TRC·TRE·TRCF with \varnothing -index 40-100mm
- Special linear guide with no small bend radii
- Up to 490mm retraction length
- Space-saving and cost-effective
- Maintenance-free drylin® W linear unit

RSEL·RSSL retraction system

Cost-effective linear retraction system

Cost-effective, linear retraction system - triflex® RSEL and triflex® RSSL

Avoid loops forming on the robot head - more cost-effective - with the RSEL or RSSL retraction system. Especially designed for robots with medium to high payload, the igus® triflex® RSEL and triflex® RSSL retraction systems offer an option to actively avoid loops forming in the working area of the robot by keeping the e-chain® as close as possible to the robot arm.

- Cost-optimised retraction system, easy to retrofit
- Due to standard dimensions and the very compact design, the RSEL and RSSL retraction systems can be mounted directly on the 3rd axis of all common types of robots
- Retraction element with elastomer band - triflex® RSEL
- Retraction element with tension spring - triflex® RSSL
- Prevents hanging e-chain® from hindering or blocking movement, even in highly dynamic applications
- Short design
- Attachment options for numerous robot models
- For robots with high and medium payloads
- The fixed end of the e-chain® can be placed freely due to the linear design of the RSE and RSSL retraction systems

triflex® R accessories

Telescopic triflex® TRX

Video animation online: Please scan the QR code or visit www.igus.eu/TRX-animation

Parallel routing of the cables due to strain relief at the end and centre

Adjustable retraction force

Easy filling and replacement of cables

Defined torsion stop-dog

Adjustable retraction length

Telescopic and twistable combined in one e-chain® - triflex® TRX

The telescopic triflex® R TRX combines the triflex® R energy chain and a retraction system in one. The combination enables a space-saving installation with length extension of up to 36%. The length extension also prevents loop formation at the robot. The round shape of the 'easy' design is highly resilient and makes it possible to insert and remove harnessed cables easily.

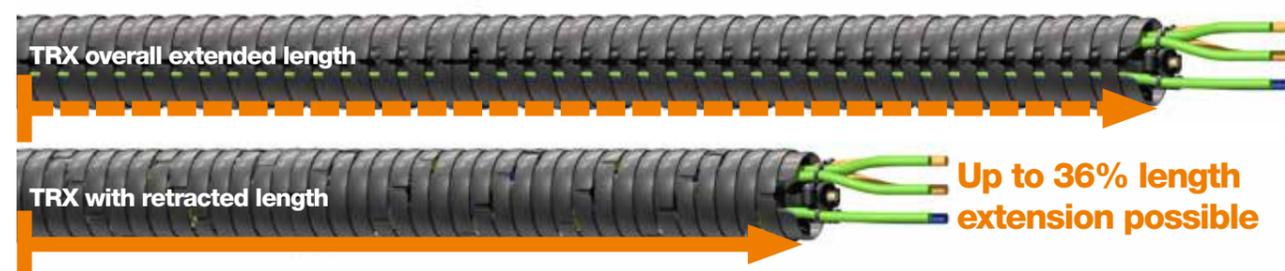

- The TRX complements the functions of the triflex® R series and now also makes them telescopic
- The rubber band inside the TRX retracts the e-chains® links back to their starting point and the retraction force can be adjusted via the rubber band
- Weight reduction of up to 83% compared to a solution with a retraction system (RSP)
- Minimises loop formation
- Space-saving design
- Easy to retrofit

60.	TR.912.099	75	80	12.5	325	625	326

The compact connection TR.920.237.60.01 in combination with the angled tube TR.912.099 offers the greatest possible degree of freedom when connecting to the robot. The elongated holes in the adapter consoles of the angled tube enable direct attachment to a large number of robot models without additional adapters. In addition, the compact connection convinces with its space-saving design for an optimal connection point even in confined cells.

triflex® R accessories

Fibre-rod module and universal mounting kits

Fibre-rod modules for a directional pretension of the e-chain®

We supply fully assembled fibre-rod modules for triflex® R e-chain® Series TRC and TRE. The integrated fibre-rods generate a directional pretension for the e-chain®. This system creates a unique choice of movements for the energy supply system to the final axis of industrial robots. The fibre-rod module guides the unsupported e-chain® to the front, parallel to the robot arm. The bending properties of the modules depends on the installation orientation: only the front end allows flexible movement. The five rear e-chain® links are rigidly connected to allow relative movement of the integrated fibre-rods. This results in a fully contactless and therefore zero-wear energy supply system, designed for moderate movements with limited rotational motion of the axes. Additional e-chain® without fibre-rods for the final axis area needs to be ordered separately.

triflex® R accessories

Adjustment unit for retraction systems

Wide adjustment range of $\pm 250\text{mm}$

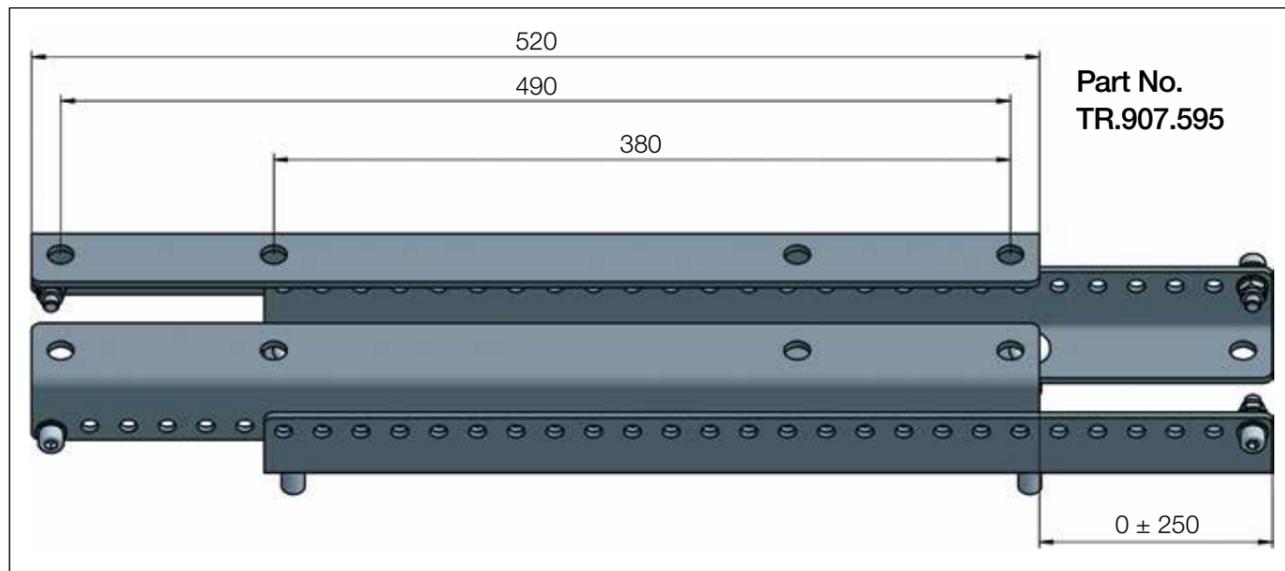

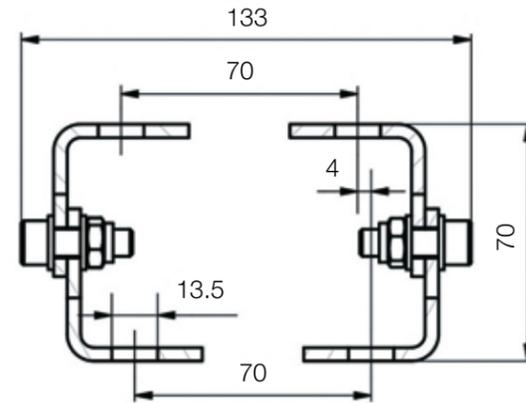

Can be combined with igus® adapter consoles

Simplifies alignment for robot cells with restricted space

Part No. TR.907.595
weight: 5.0kg

Adjustment unit for RSP and RS retraction systems

The optional adjustment unit is installed between the robot arm and the retraction system, and allows accurate adjustments of the position of the igus® retraction system on the robot arm. Particularly useful for multiple working programs using the same cable package.

Adjustment unit to easily change the position of the retraction system

triflex® R accessories

Adapter consoles for retraction systems

Adapter consoles for many robot models, from stock

For all triflex® R retraction systems and fibre-rod modules

3D CAD data available online for download

► www.igus.eu/consoles

Also for robots needing side-mounted installation

Adapter consoles for all igus® retraction systems

The retraction systems provide all widely used drill patterns for attachment: 380 x 70mm and 490 x 90mm (in $\varnothing 12.5\text{mm}$). We also supply a wide range of manufacturer and model-dependent adapter brackets from stock, in order to adapt to other robot variations. For example, many robot models are equipped from the factory with only side-mounted mounting options - in these cases, our adapter product range also supports simple installation of the retraction systems without additional engineering.

Swivel bracket - robot rotation up to 270°

The triflex® R swivel bracket is a cost-effective solution for implementing the rotary movement on the 1st axis of an industrial robot. Rotary movements of up to 270° can be implemented. Due to the slim and space-saving design, this system can also be used in very tight installation spaces. The use of lubrication-free bearings also makes this system low-maintenance and environmentally friendly.

twisterchain advantages

e-chains® for circular and spiral movements up to 360°* available from stock

Smooth cable-friendly interior

Crossbars openable along the inner and outer radius

Modular; variable width, height and bend radius

Stronger, higher fill weights possible with intermediate link

Highly dynamic and smooth running

Strong, quiet and up to 360° - circular and spiral movements - twisterchain

The igus® twisterchain product line offers an extensive range of products for circular movement and is available in four sizes. Its modular width and radius design ensures it can be used flexibly in applications with rotary and spiral movements up to 360° and more, with high fill weights and where smooth operation is required. twisterchain applications are available with modular guide troughs which offer: e-chain® guidance, reduced e-chain® wear, optimal levels of smooth operation, angle of rotations up to 360° from stock.

- Strong, high fill weights, smooth operation, weight-optimised
- Rotary speeds up to 1m/s and more
- Circular/spiral movements up to 360° from stock (up to 400° upon request)
- Cable-friendly, smooth interior ● Crossbars openable along the inner and outer radius
- Successfully tested for over 1 million cycles in the igus® laboratory

 e-chains® for circular movements up to 360° available from stock (up to 400° upon request)

UL94-V0 classification upon request

The complete product range with ordering options, D CAD, configurators, PDF and application examples ► www.igus.eu/twisterchain

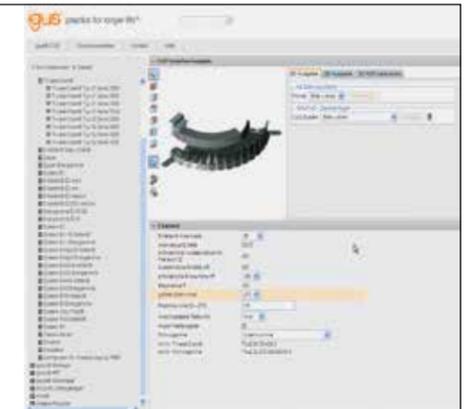

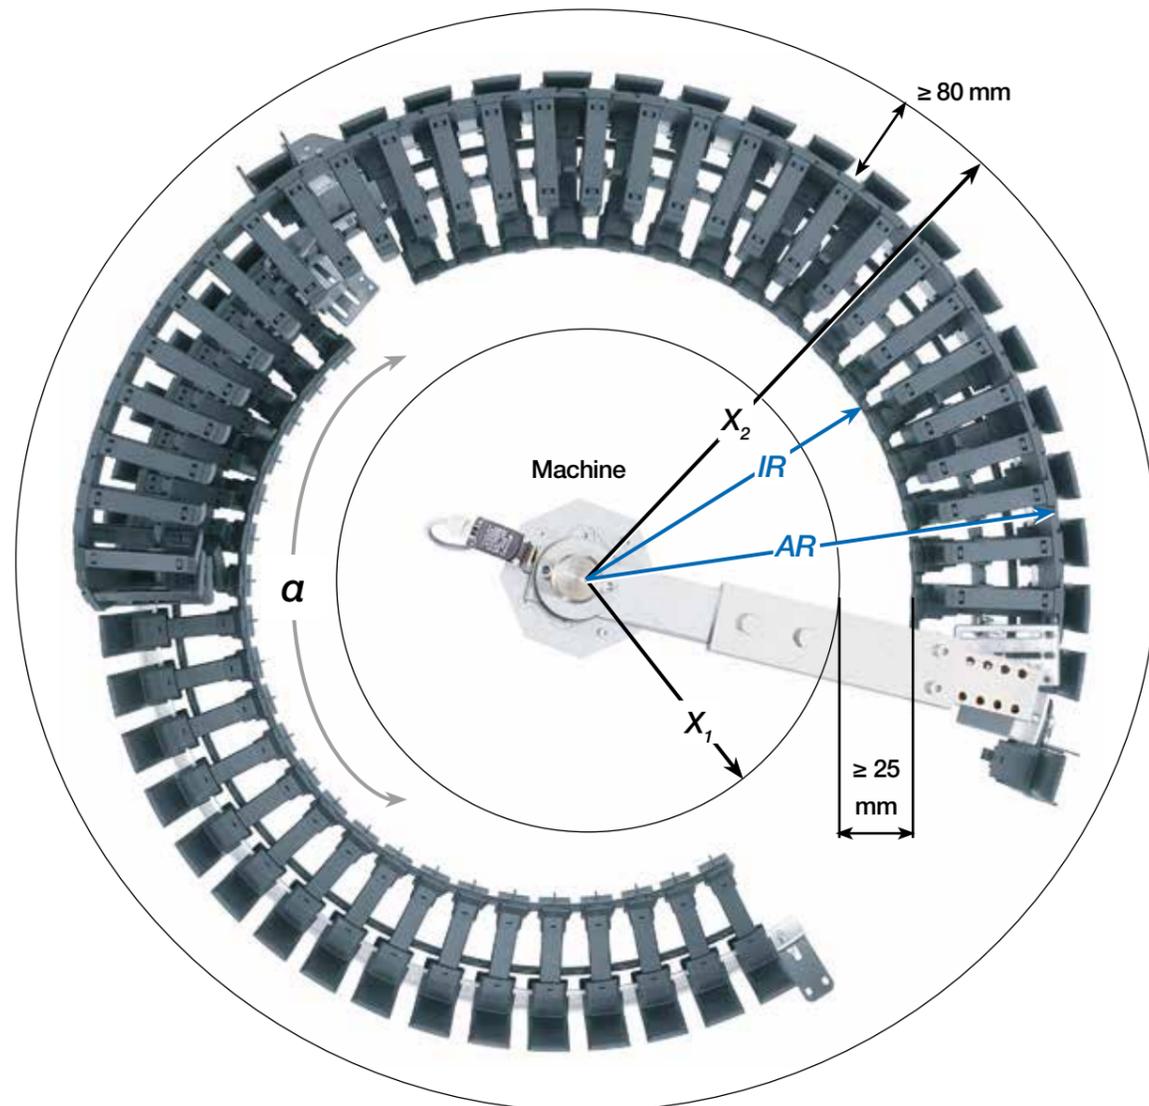

Available from stock. Ready to ship in 3 - 5 business days*

*Average time before the ordered goods are dispatched.

Quickly generate complete twisterchain 3D CAD models

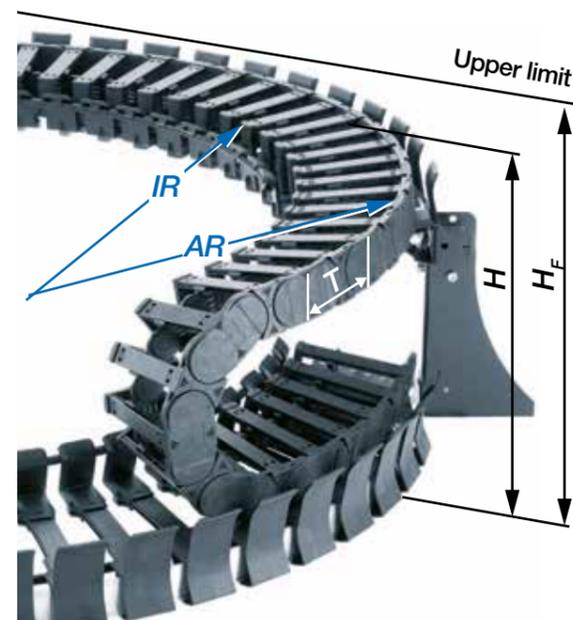

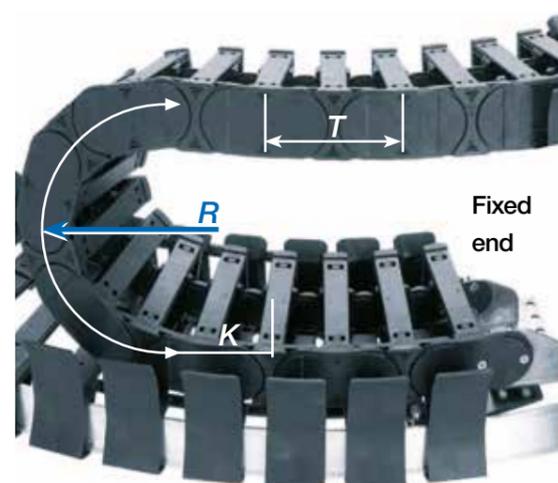

- Get complete 3D models just by inputting the angle of rotation and basic dimensions
 - Free positioning of the e-chain® moving end along the travel length
 - Optional generation of twisterchain as a single part or complete with guide trough and base support
 - Fast download of the CAD data without registration
 - 11 different 3D and 8 different 2D CAD formats are available
- More information ► www.igus.eu/twister-configurator

twisterchain general information

In the case of machines that travel in a circular movement both to the left and to the right, the total angle of rotation is calculated by adding the two angles.

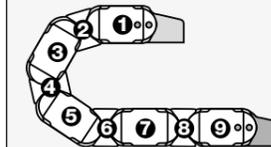

Technical data

	Speed / acceleration	upon request
	Material - permitted temperature °C, igumid G	-40°C/+120°C
	Flammability class, igumid G	VDE 0304 IIC UL94-HB

Order example | Order key

Order example for complete e-chain® (1.0m), colour black, with mounting brackets:

e-chain® (1.0m)	Please indicate e-chain® length or odd* number of links: 1.0m or 11 links	TC56.12.250/650.0
+ Mounting brackets	1 set	TC5600.34.VS.E
Order text:	1m TC56.12.250/650.0 + TC5600.34.VS.E	

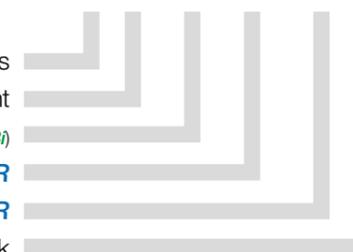

*Important note:

twisterchain e-chains® must always start and end on an outer side link (odd number of links). An outer side link should always be the first link at the moving end.

twisterchain in a guide trough for rotary movement on an articulated robot - long service life and robust: tested successfully for more than 1,000,000 cycles

Installation dimensions

Dimension A1 dependent on outer radius AR

AR	R 150	R 200	R 250	R 300	R 400
[mm]	A1 [mm]				
650	83	85	88	90	97
750	98	101	102	103	110
850	113	116	117	118	124

Dimension A1 always with tolerance of ± 2.5mm

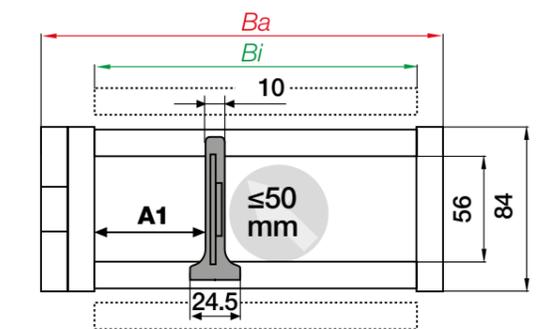

Note: Outer radius AR (see drawing) determines dimension A1!

Intermediate link

The cable-friendly intermediate link increases the strength and stability of twisterchain many times over. It also serves as interior separation, dividing the filling space into two chambers. Outer radius AR determines dimension A1.

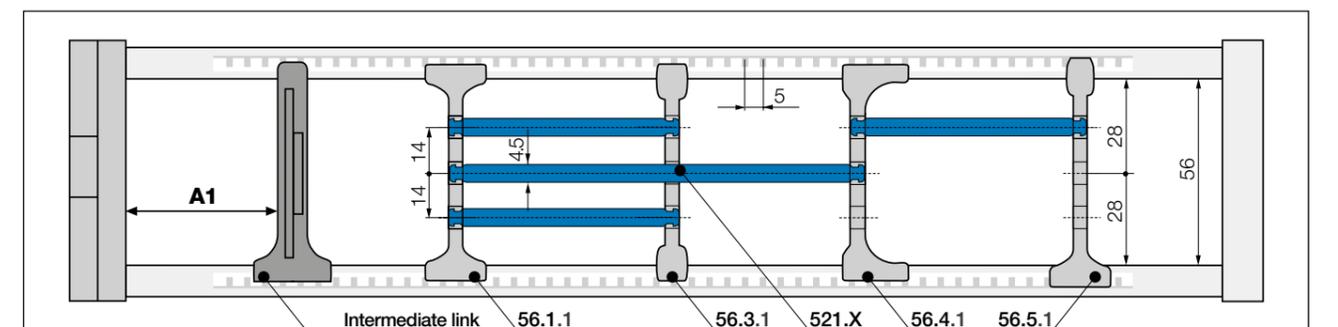

Dimensions

Serie TC56 | Additional parameters dependent on outer radius AR

AR	Max. fill weight α 0° - 180° [kg]	Max. fill weight α 180° - 360° [kg]	Max. V [m/s]	Max. a [m/s ²]
650	8.0	5.0	1.0	2.0
750	8.0	5.0	1.0	2.0
850	8.0	5.0	1.0	2.0

Series TC56 | Interior separation

For this series the interior separation products for series E4.56 may be used ► www.igus.eu/E4.56

- i** AR = Outer radius e-chain®

Applications

twisterchain application on a cleaning robot

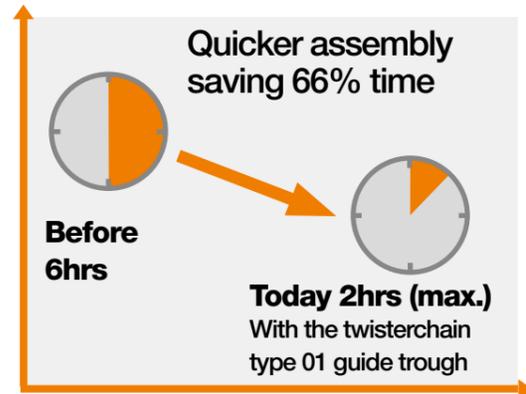

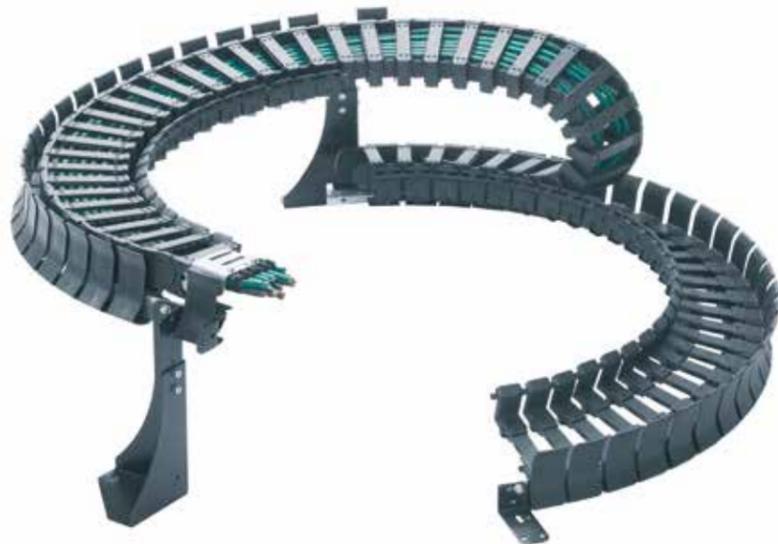

twisterchain application on the robot 7th axis

twisterchain accessories

Guide troughs

Save installation time and cost -
better guidance for circular movement -
increase service life!

With the twisterchain trough, complex adjustment work is reduced and so assembly time is reduced from 6 hours to 2 hours. It also reduces noise, whilst travel speed and service life can be increased, thanks to its nearly all-plastic design. Available for all twisterchains from the new and original product range.

- Suitable for high dynamics thanks to full guidance of the upper run
- Much smoother and quieter motion of the twisterchain in the trough due to continuous guidance of upper run
- Upper run guided in the plastic trough and supported over the full length
- Fully harnessed delivery possible
- Easy adjustment, alignment and handling
- Assembly time reduced from 6 hours to 2 hours

twisterchain guide trough options

9XXX.31
Complete trough
(with base support, height adjustment and attachment angle brackets)

9XXX.32
Upper and lower run trough
(without floor support and height adjustment)
Special option: customer supplies base supports

9XXX.30
Lower run trough
(with mounting angle brackets)
Special option: customer builds upper run trough

twisterband advantages

Up to 7,000°* rotary movements in small spaces - twisterband

With the compact igus® twisterband, rotations of up to 7,000°* can be achieved cost-effectively, even in confined spaces. Energy, data and media are securely guided.

- Up to 7,000° rotation horizontally and 3,000° rotation vertically
- Rotary speeds of up to 180°/s possible
- Openable with film hinge or openable "easy" design
- HD version with strong pin and hook connection for an even longer service life
- Compact, modular and light
- Strips can be shortened as required
- Minimum installation spaces, fits tightly around the rotary axis
- Cost-effective and easy to fill

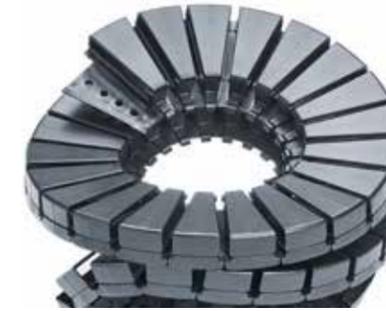

Typical industries and applications

- Cable reels ● Robots (robot arms, axis1/6, SCARA robots)
- Machine tools ● Medical equipment ● Radar and telescope equipment
- Aerospace, test, measurement, handling, lifting and installation equipment
- Wind turbines (e.g. blade adjustment)
- Wherever rotary unions are used

*Rotary movements up to 3,600° can be ordered from stock. Above 3,600°, please contact igus®.

twisterband features

A central shaft must be installed for horizontal orientation angles of rotation above 1,500°

Max. angle of rotation: as a rule of thumb: each segment gives 180° = 360° more rotation

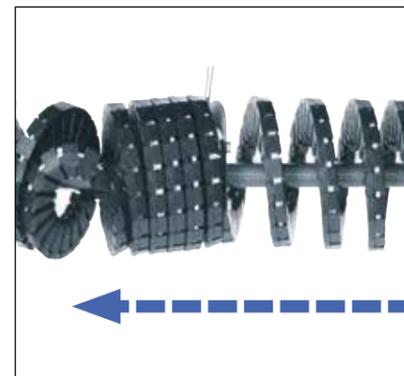

igus® twisterband: minimum installation space, fits tightly around the rotary axis

Film hinge: easy access and quick filling with cables and hoses

Compact, modular, cost-effective - up to 7,000° rotary movement* in the most confined spaces

Can be reliably used in various installation positions (horizontal: 7,000° and more). Limited length compensation possible

The twisterband HD is an advanced version of the standard twisterband ...

... instead of bands with integral hinges, the twisterband HD version is composed of separate e-chain® links with the pin/hook connecting system ...

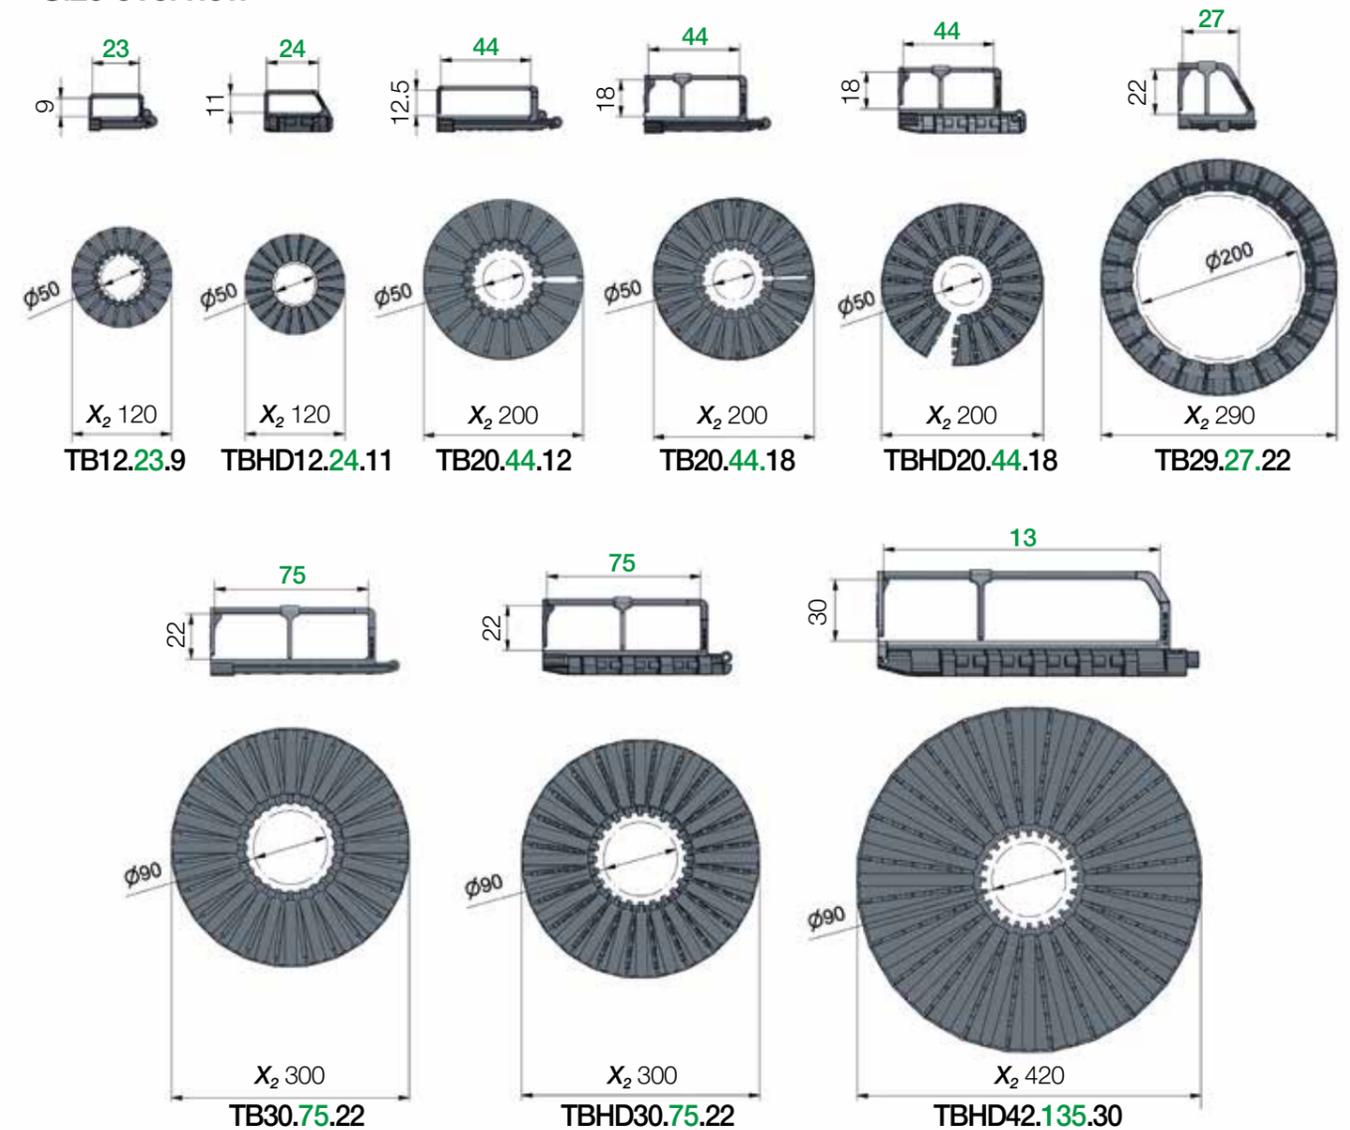

... the advantage is a defined radius with higher strength.

 hi = Inner height e-chain® X2 = Outer machine limit ≤ R = Max. bend radius e-chain® XX = Number of strips

Rotating energy supplies

Modular system for fast rotating applications with *RBR*

The rotating energy supply systems consist of an e-chain® with a Reverse Bend Radius (*RBR*) and a guide trough system adapted to the e-chain® and the circular motion.igus® offers both trough systems designed for specific projects and some dimensions as pre-engineered standard rotary modules. These guide trough systems consists of two circular guide elements. One part of the guide trough is attached to the static part of the system and the other part to the rotating part of the system. The fixed end of the e-chain® can be freely placed, as both the inside and outside parts of the rotary modules can be rotated. Reverse Bend Radius means that the e-chain® can bend in two directions. Versions with Reverse Bend Radius (*RBR*) can be made for many igus® e-chains® by reworking the standard chain links. The *RBR* does not necessarily need to be identical to the normal bend radius (*R*) of an e-chain®. A wide range of circular movements can be achieved with the RBR option.

- Maximum rotation angle in minimal installation space
- Minimum displacement forces and maximum service life
- Modular construction with standardised mounting options
- Integrated strain relief and cable guidance directly in the guide trough
- Determine the rotating energy supply quickly and easily ► www.igus.eu/rbr-configurator
- Depending on the application in question, the e-chains® glide on surfaces made of plastic, stainless steel or galvanised steel and are guided by special channels in a predefined circular movement.
- Failsafe cables for rotary guide systems ► www.igus.eu/chainflex

Configure in seconds ...

- The length of the e-chain® is calculated according to the rotation angle and the diameters
- The e-chain® length required for your rotation angle can be determined easily, quickly and reliably via the igus® CAD configurator.

More information ► www.igus.eu/rbr-configurator

e-chains® with *Reverse Bend Radius* available from stock. Ready to ship in 24-48 hours.*

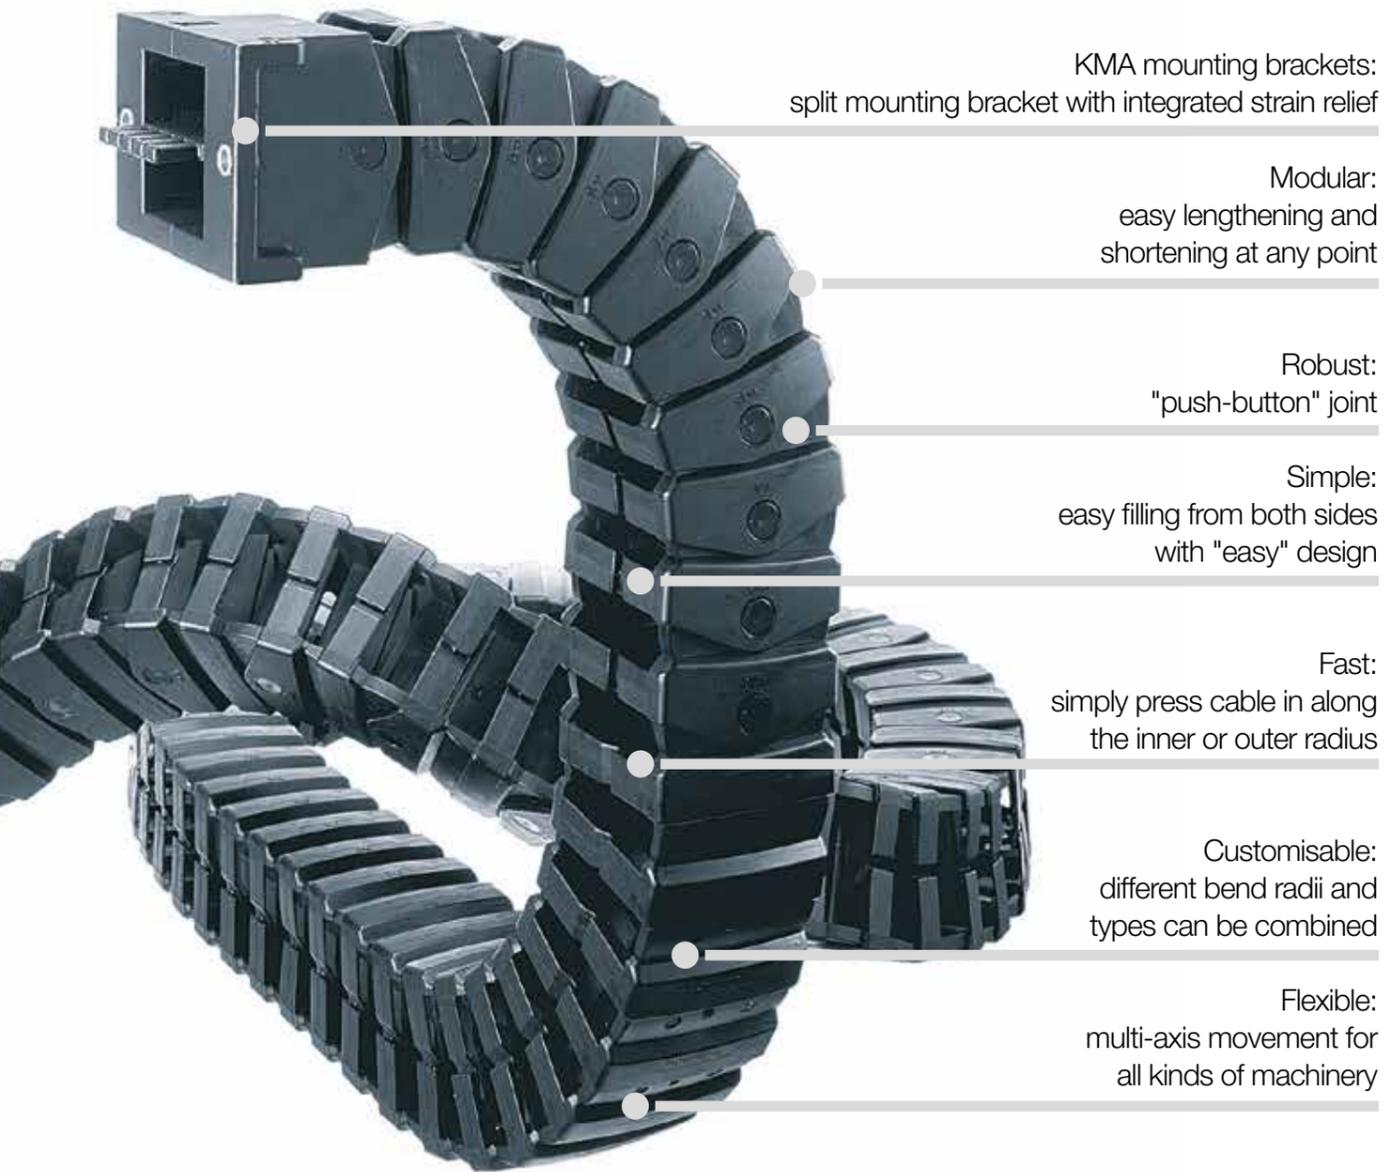

*Average time before the ordered goods are dispatched.

A red 3D e-chain is shown in two configurations. On the left, it forms a large arch, demonstrating its flexibility. On the right, it forms a horizontal line, showing its strength and stability. The chain consists of multiple rows of interlocking links, each with a circular hole in the center. The links are connected in a way that allows the chain to bend and curve while maintaining its structural integrity.

More 3D e-chains[®] for simple movements

easy triflex[®] | triflex[®] |

easy triflex® advantages

KMA mounting brackets:
split mounting bracket with integrated strain relief

Modular:
easy lengthening and shortening at any point

Robust:
"push-button" joint

Simple:
easy filling from both sides with "easy" design

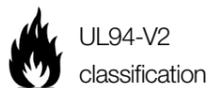

Fast:
simply press cable in along the inner or outer radius

Customisable:
different bend radii and types can be combined

Flexible:
multi-axis movement for all kinds of machinery

For simple 3D applications, easy filling from both sides - easy triflex®

The easy triflex® series was developed to offer safe energy supply for multi-axis movements. In doing so the flexibility of a hose was combined with the stability and defined bend radius of an e-chain®. With easy triflex® the installation of cables and hoses is simple. With flexible crossbars the cables are simply pushed into the e-chain® from either side. The unique modular range allows very complex movements. For example it is possible to combine 1- 2- and 3-axis links in one e-chain®.

triflex® advantages

Universal:
KMA, flanged and angled mounting brackets available

Customisable:
different bend radii and types can be combined

Protection:
completely enclosed - protection against dirt and chip

Modular:
combination of fully enclosed and openable types is possible

Variation:
openable series 352 and 353, 50mm cross section

Effective:
cost-effective for complex movements

Modular:
easy lengthening and shortening at any point

Enclosed for simple multi-axis applications - triflex®

The triflex® series was developed to allow safe energy supply for multi-axis movements. In doing so the flexibility of a hose was combined with the stability and defined bend radius of an e-chain®. The unique, modular product range allows very complex motions. For example it is possible to combine 1- 2- and 3-axis links in one e-chain®.

E4.1/E4Q

e-chains® and e-tubes
for safe energy supply
on the robot 7th axis

Ready-to-connect, harnessed e-chain
systems®, e.g. for axis 7,
e-spool® flex 2.0 ▶ From page 180,
readychain® ▶ From page 246

E4.1 system advantages

Attachment from any side with KMA mounting brackets

Swarf protection: openable lids

Quiet operation: optional noise dampers

Long service life: lateral gliding surfaces

25% faster: easy assembly with QuickLock-crossbars

Straight run: due to inner/outer link principle

No pretension: NC version by rotating the outer link

Precise partitions: notch crossbar with visual scale

High strength: due to undercut design

Low-noise operation: due to integrated brake

Safe energy supply for axis 7 - E4.1

Reliable energy supply for axis 7 with igus® e-chains®. igus® e-chains® are also the ideal partner for your robot application over long travels (in conjunction with igus® guide troughs), high acceleration rates or in dirty environments.

- Undercut design for high lateral stability
- High push/pull strength for long travels and unsupported lengths
- Well suited for side-mounted applications
- Noise-reducing brake and optional noise dampers
- Inner and outer links for quick assembly, with or without pretension

IPA Qualification Certificate - Report IG 1303-640-1: ISO Class 2, according to DIN EN ISO 14644-1 for series E4.32.10.063.0.CR at v = 0.5m/s, 1.0m/s, 2.0m/s

41 dB(A) - value determined at the igus® test-lab, v = 1.8m/s unsupported, series E4.21.060.038.0

Electrically conductive ESD e-chains® - several series available from stock

Design principle ...

Undercut, combined with the inner/outer-link solution

Smooth, cable-friendly inner surfaces

Low-noise operation due to integrated brake on the radial stop-dogs

Smooth and wear-resistant gliding surface - no additional glide shoes required

Option with or without camber simply by reversing outer links

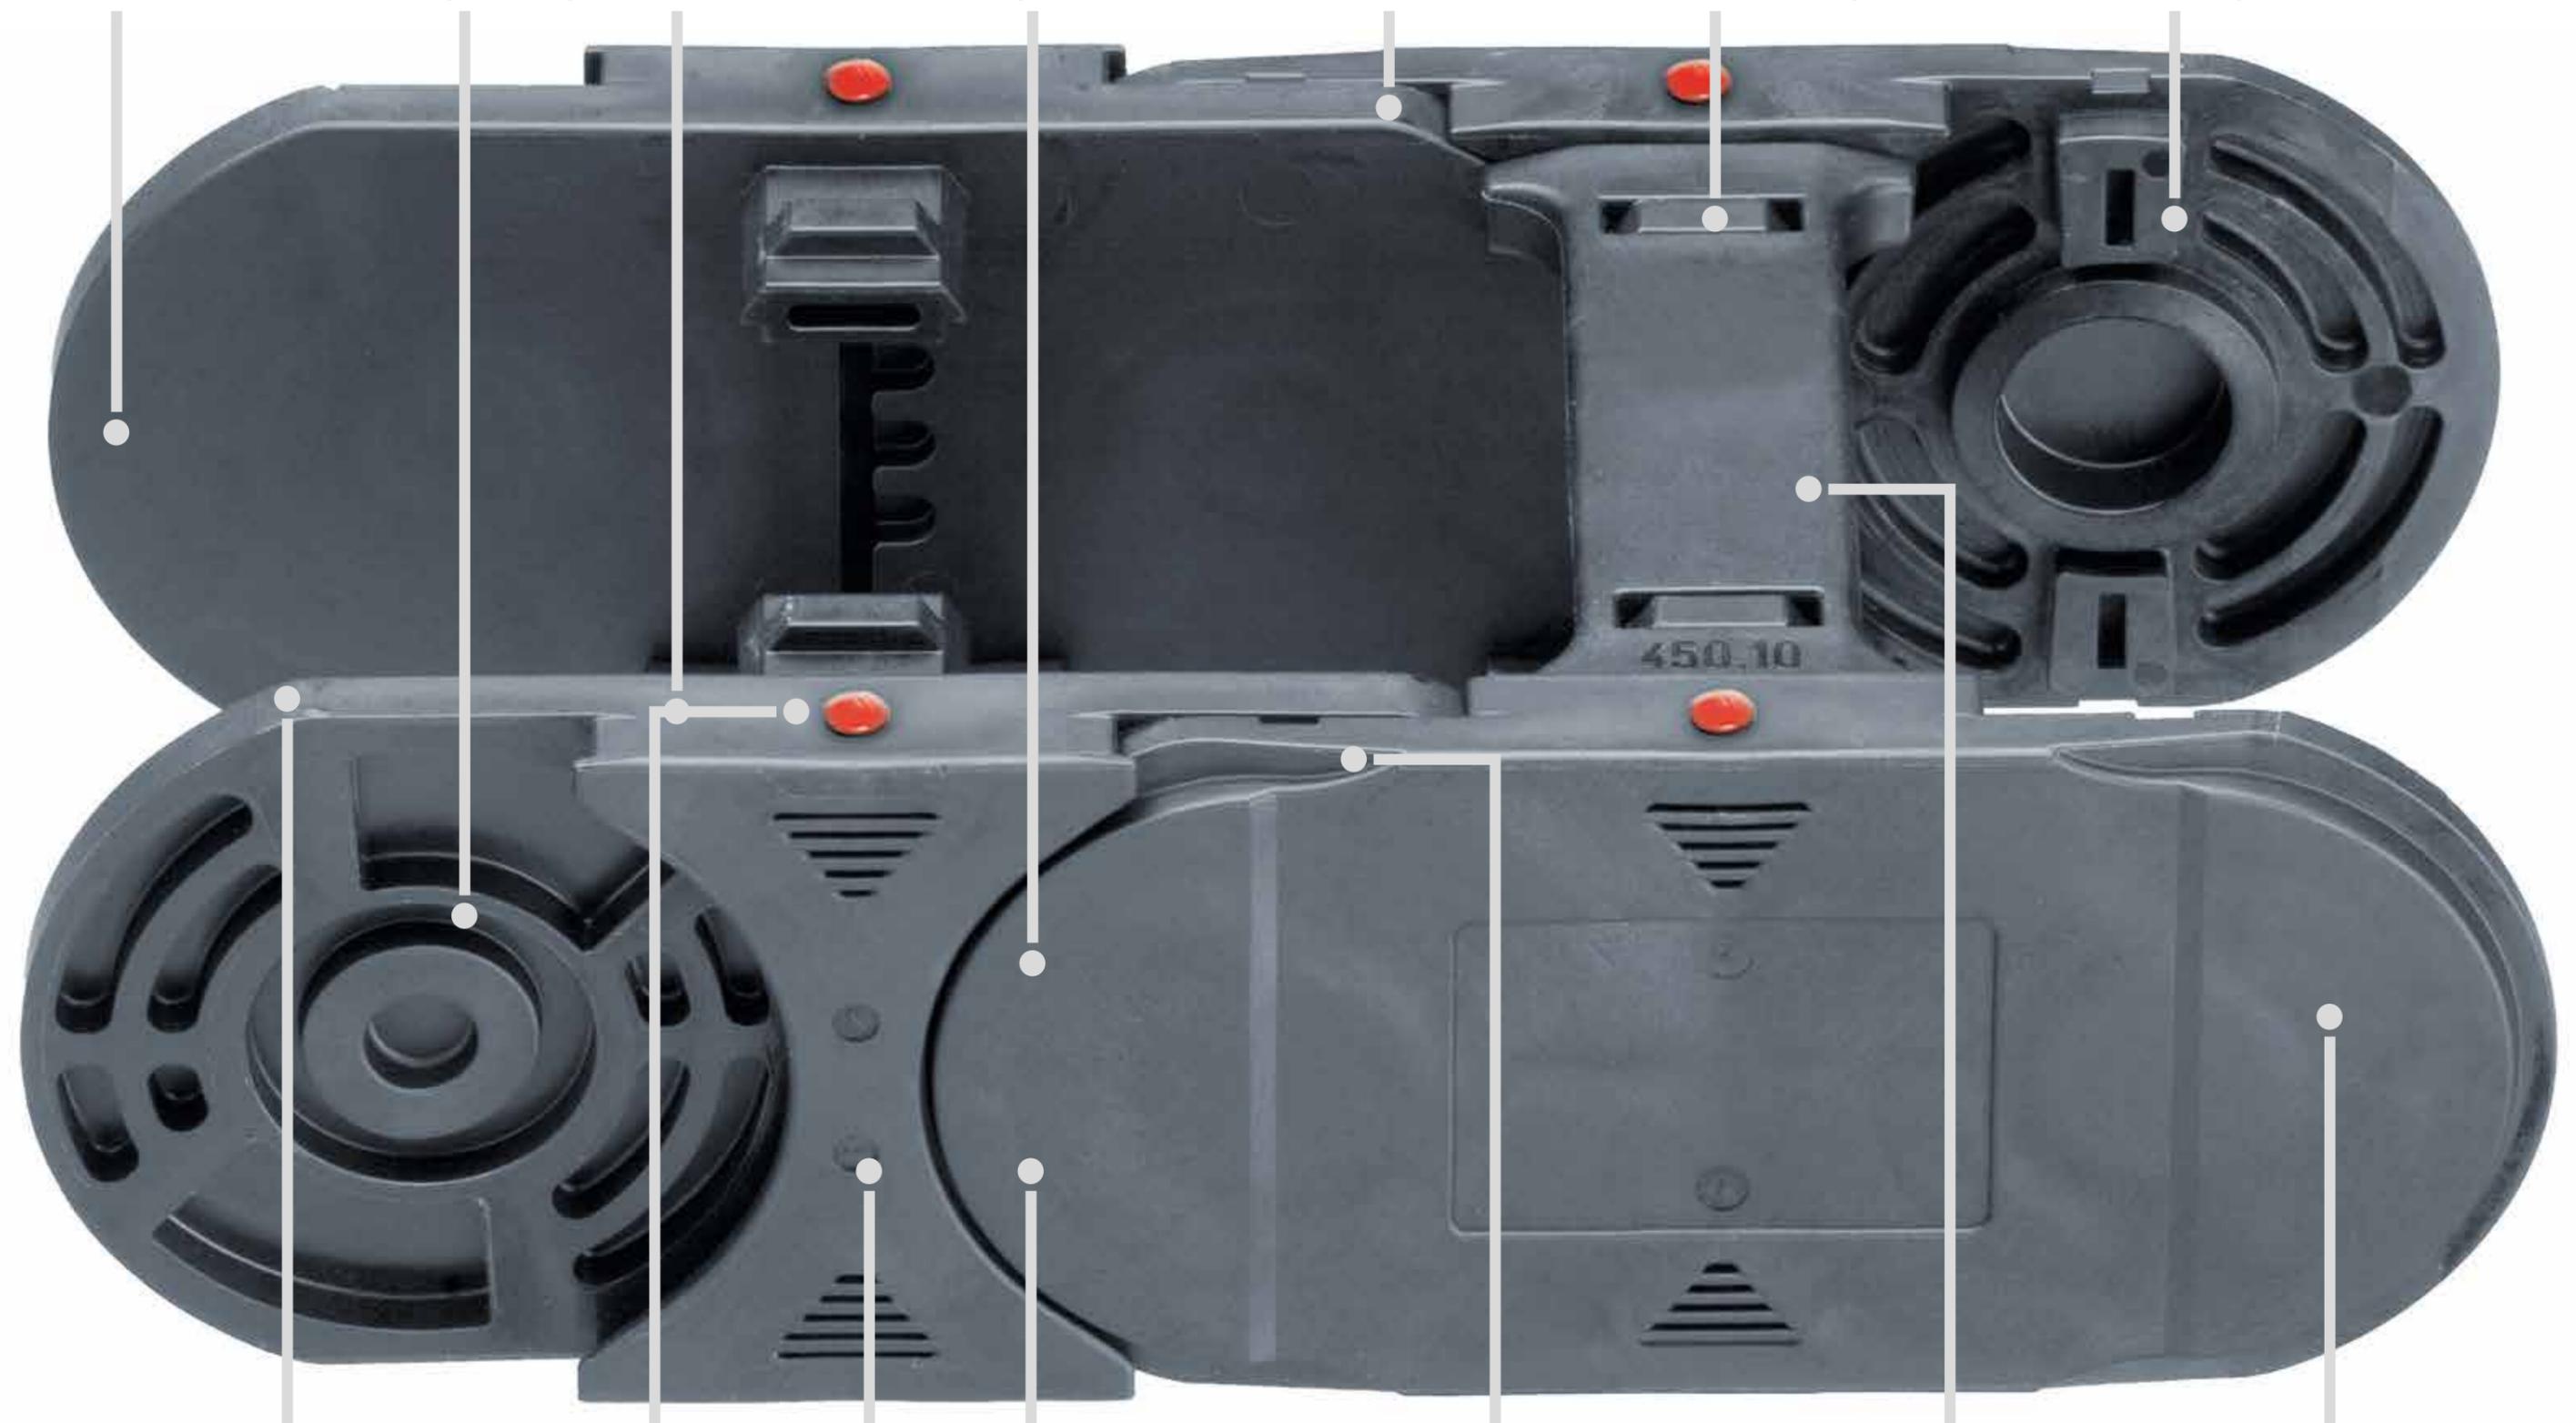

E4.1 system

High stability and strength and easy installation

ESD version ideal with large undercut contact area

Strong crossbars with double locking

Double vertical stop-dog system for larger unsupported lengths

Special e-chain® link contour provides low rolling noise

Optional noise dampers

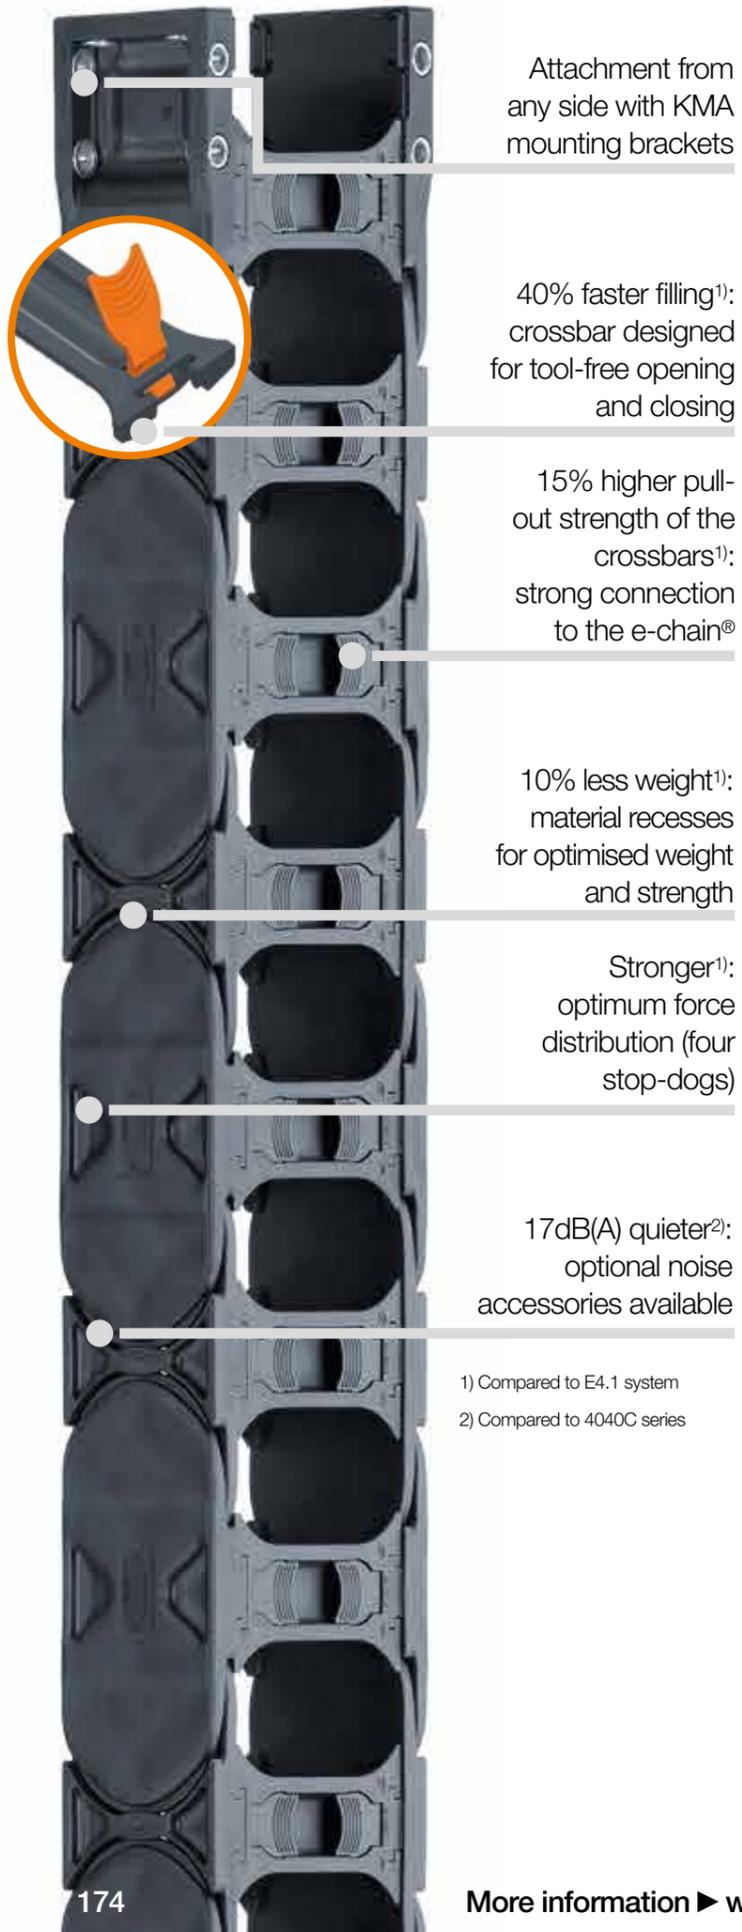

Straight run and fast assembly due to inner/outer-link design

Very high stability due to the undercut design

Cable-friendly, rounded crossbar

Integrated lateral wear pads for a long service life (also for side-mounted applications)

E4Q system advantages

Attachment from any side with KMA mounting brackets

40% faster filling¹⁾: crossbar designed for tool-free opening and closing

15% higher pull-out strength of the crossbars¹⁾: strong connection to the e-chain[®]

10% less weight¹⁾: material recesses for optimised weight and strength

Stronger¹⁾: optimum force distribution (four stop-dogs)

17dB(A) quieter²⁾: optional noise accessories available

1) Compared to E4.1 system
2) Compared to 4040C series

The next generation of safe energy supply systems for axis 7 - E4Q

Easy opening and closing, without tools. The latest E4Q e-chains[®] generation combines proven design features of the 12-year old, robust E4.1 e-chains[®] standard with new bionic design elements and a novel opening mechanism. This gives the E4Q an even longer service life and significantly improved ease of installation.

- Tool-free opening and closing
- Sustainability - 10% less material means 10% less energy consumption during production
- Short cross-bar pickup for even easier filling of the e-chain[®]
- Optimised interior geometry for longer cable service life
- Integrated grid structure on crossbars for fixed interior separation with narrower separators
- Inner/outer link principle for straight run
- Undercut design ensures the best hold as well as high lateral and torsion strength

Easy handling - opening and closing of an e-chain[®] without tools, save up to 40% assembly time compared to E4.1 series

Design principle ...

Open and close the e-chain® easily without tools

E4Q system

Simple handling

Optional noise dampening - new system for noise reduction. 17dB(A) quieter than the 4040C series

Open and close the E4Q e-chain® entirely without tools. 40% faster installation or filling than the E4.1 system

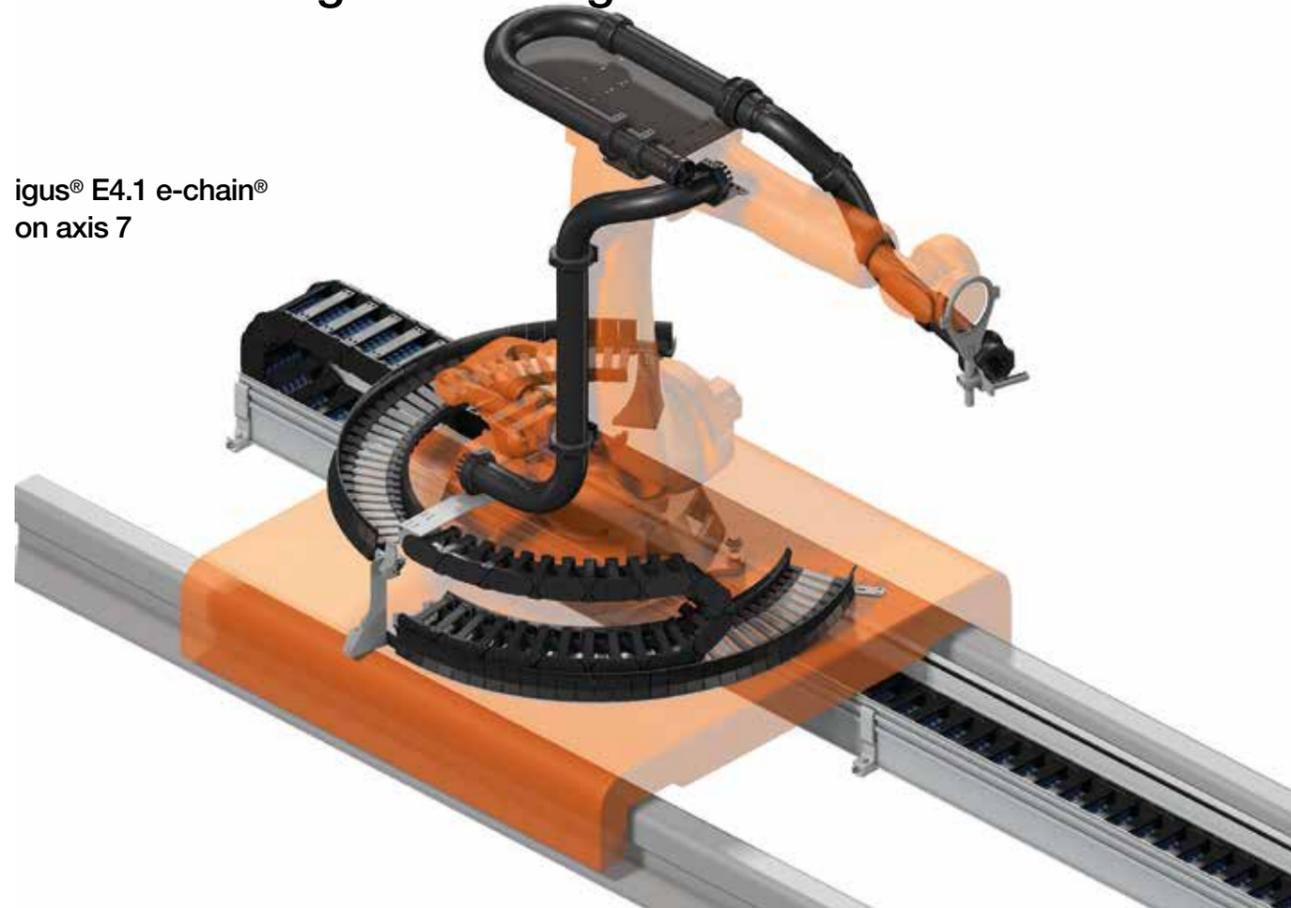

Lighter e-chain® link structure thanks to material savings in design. 10% lighter than the E4.1 system

More strength and a higher unsupported length than with the E4.1 system thanks to vertical and horizontal stop-dogs

E4.1/E4.Q

Other advantages and design features

igus® E4.1 e-chain® on axis 7

Application	Design features
Long unsupported lengths	Special stop-dogs, undercut design
Quiet operation, unsupported/gliding	Built-in "brake", smooth gliding surfaces, optional noise dampers
Hanging & standing installation	Torsional strength through undercut design, option "without pretension" (by turning the outer link)
Long travels	High thrust forces due to undercut design and stop-dogs, large and smooth gliding surfaces
Unsupported, side-mounted	Undercut design increases side-mounted unsupported length
Fast assembly	Inner/outer link principle
Circular movements	By reworking the links
Increase the cables service life	Smooth, wide, solid plastic load-bearing surface for cables, interior separations that can be assembled quickly
Increase the e-chain® service life	Large pins and optimised material, high strength
ESD	Undercut design for safe contact surfaces when moving (special version in conductive material)
Dirt, chips and humidity	Undercut design prevents broken chains, dirt-resistant construction

Wear tests

Increase the service life of the cable with igus® components

Cables last up to 4 times longer

With the optimised igus® separators, the service life of cables and hoses can be increased by a factor of 4 - the rounded base, which creates a smooth transition to the crossbar, does not offer any interfering edges on which the cables could rub. The force-fit seating offers excellent holding force for e-chains® and e-tubes.

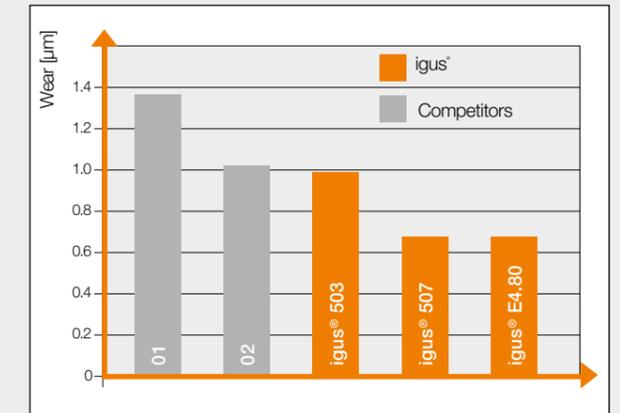

More durable thanks to plastic crossbars

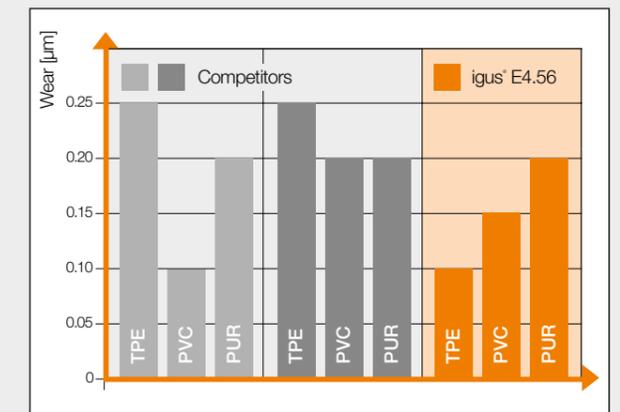

igus® tests have shown that the abrasion of the cables is the lowest in e-chains® with igus® plastic crossbars, which have a rounded cable-friendly design. The holding force is very high. Crossbars made from a wide variety of materials were subjected to a tensile test at the igus® testing facility. igus® plastic crossbars are flexible and strong.

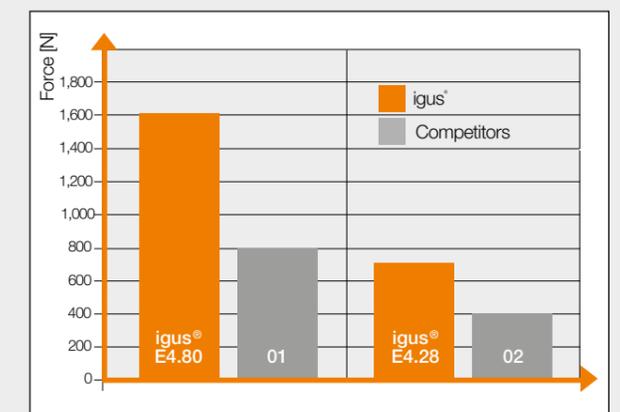

Increase the service life of the cable with optimised, rounded igus® separators and cable-friendly plastic crossbars

Wear of plastic separators: with igus® separators, the wear on the cables could be almost halved

Cable wear on plastic crossbars - ideal service life with igus® plastic crossbars

Closing force comparison of plastic/aluminium crossbars - Best service life and highest holding force of the igus® crossbars

e-spool® flex 2.0 advantages

Easy handling: pull-out force is almost constant and secure locking

Without interruption: for energy, data, fluids and air

Assembly-friendly: easy replacement of the cable, even with connectors fitted

Space-saving: cable retracts into a compact unit

Continuous panel feed - e-spool® flex 2.0

The e-spool® flex 2.0 is the igus® cable drum without a slip ring. Cables diameters from 5mm to 15mm can be used. The cable is always safely routed through a feed-through to ensure that it is properly wound up at all times.

- Without interruption (no slip ring), for energy, data, fluids and air
- Space-saving
- Universal assembly
- Constant tensile strain on the cable
- Locking mechanism
- Easy in case of repair
- Simple replacement of the fitted cable, therefore adaptable
- Four configurations, adaptable to the respective requirements

Available from stock. Ready to ship in 5 - 10 business days*
*Average time before the ordered goods are dispatched.

Product range

The e-spool® flex 2.0 the cable drum without a slip ring

e-spool® flex 2.0 | Product range

With retaining spring, locking mechanism and retraction brake	SB	S pring with Position Hold and B reak

* Available upon request Delivery time upon request.

Note: Please consider VDE 0298 part 5 (current carrying capacity and conversion factors for wound cables) when selecting your cables and using e-spool® flex.

Technical data

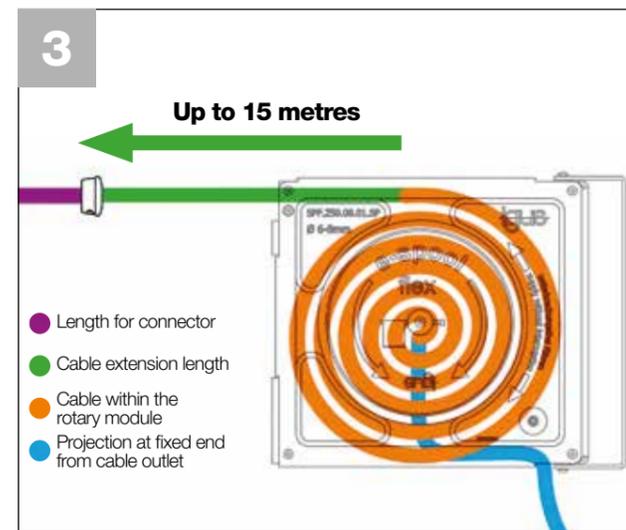

e-spool® flex 2.0 design

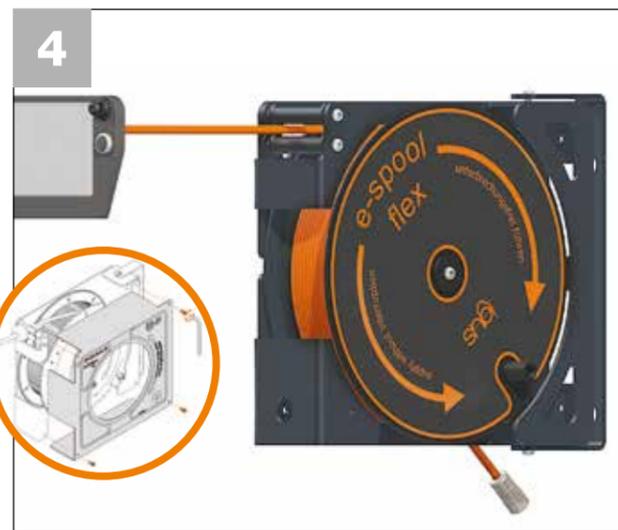

Cables or hoses are inserted into the e-spool® in a spiral pattern

The e-spool® flex in detail from the inside (from left): housing, spiral guide, cables/hoses, winding housing

Cable/hoses inserted in the spiral guide - extension length up to 15m possible

The e-spool® flex 2.0 system is simple to set up, making it easy and quick to replace the cable if necessary

 **Assembly instructions** - the illustrated assembly aid enables you to assemble the e-spool® flex 2.0 quickly and professionally ► www.igus.eu/e-spool-flex

Technical data

e-spool® flex 2.0 comparison test

	Max. speed	≤ 1m/s
	Maximum acceleration	≤ 1m/s ²
	Permitted temperature °C - e-spool® standard	0°C / +70°C
	Permitted temperature °C - e-spool® HD	0°C / +80°C
	Maximum fill weight, vertical	≤ 1kg/m

Comparison test: Pull-out forces e-spool® flex vs. competitive product

In its test laboratory, the largest in the industry, igus® compared the e-spool® flex with a competing product. The test evaluated the two products' pull-out forces. **The results** showed that the e-spool® pull-out forces were about 10 newtons, while those of the competing product were almost twice that.

Advantages of the continuous panel feed e-spool® flex 2.0

Avoid it with the newly developed cable drum for control panels. Since the new solution does not use slip rings, media, data and the power and signal supply of the emergency stop button can also be integrated into the system.

Delivery time 24hrs or today.

Delivery time means time until goods are shipped.

With the help of the service life calculator, you can quickly and easily calculate the expected service life of chainflex[®] cables specifically for your application ► www.igus.eu/chainflexlife

Ever more complex sequences of movements in industrial applications demand twistable or multi-axis flexible cables with a long service life, similar to the classic chainflex® cables for use in linear e-chain systems®. Stranding, structure, shields and jacket materials must compensate both for major changes in bending load and changes in diameter due to torsional movements. To achieve this, different “soft” structural elements e.g. rayon fibres, PTFE elements or filling elements that absorb torsion forces are used in chainflex® CFROBOT cables.

Special demands are made on the braided shielding in torsion cables. Torsion-optimised shield structures are chosen that can carry out the necessary compensatory movements thanks to special PTFE liners.

With twistable bus cables in particular, the transmission characteristics such as attenuation, cable capacitance and signal quality must remain within very tight tolerance ranges over the whole service life. This is achieved through the use of particularly torsion optimised insulating materials and mechanical attenuation elements with matching capacitance values.

The highly abrasion-resistant, halogen-free and flame-resistant PUR jacket material in motor, hybrid/control cables and bus cables protects the torsion-optimised stranded elements from possible damage. The highly abrasion-resistant, halogen-free TPE jacket achieves the special requirements of the twistable FOC and individual as well as the single core cables.

Unlike cables for linear e-chain systems®, the mechanical stress on these cables is in the combination of bending, torsion and centrifugal forces that cannot usually be determined by design or during use by means of measurement. For this reason, and unlike the situation with linear e-chain® applications, a clear “yes/no” statement cannot be made about the use of a particular cable in torsion applications. To enable evaluation to take place, based on sensible and comparable test results, the igus® “torsion test standard” was developed.

According to this standard, all chainflex® CFROBOT cables of a triflex® energy chain are twisted with a fixed point distance of one metre and a torsion of $\pm 180^\circ$ at least 5 million times.

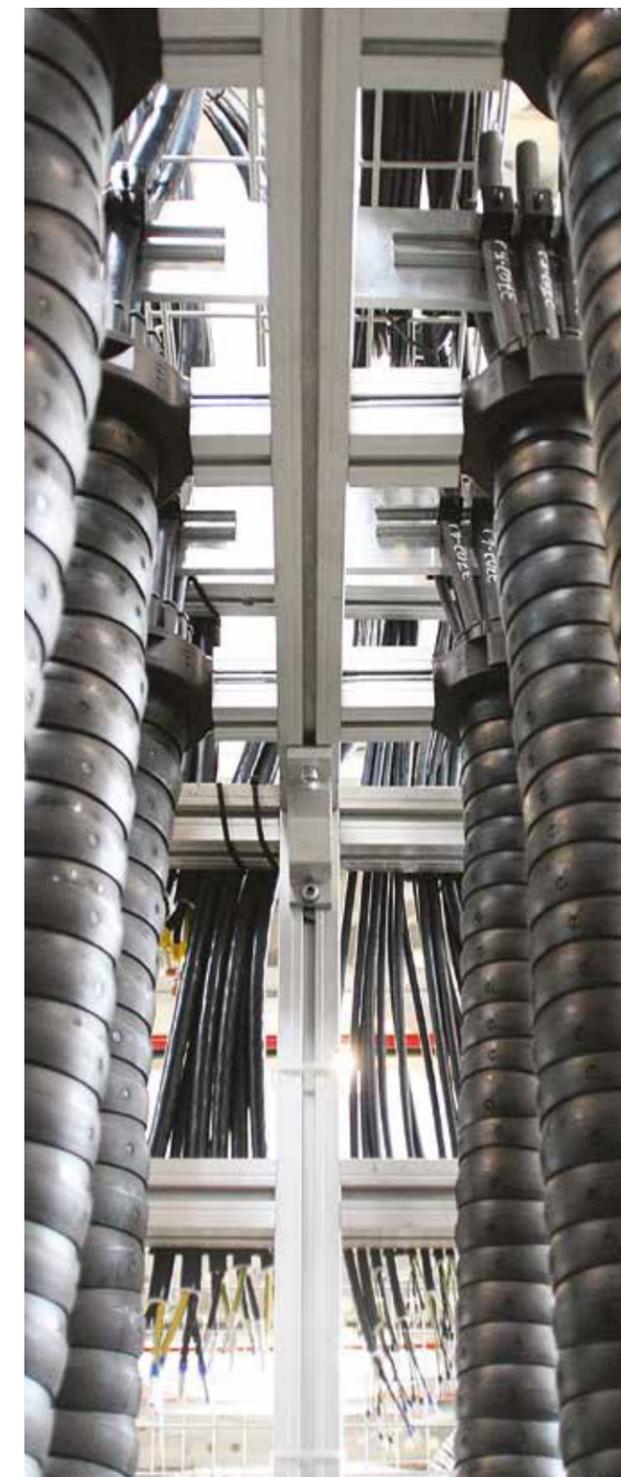

In addition, a test is carried out on a test bench with a chain length of approx. 2,500mm with 270° torsion with an extreme load through centrifugal forces and heavy blows such as those that can occur on an industrial robot. All the non-shielded, gusset-filling extruded standard chainflex® control cables of the series CF130.UL, CF5, CF9 and CF9.UL correspond to the above igus® standard and have been approved for use in torsion applications.

The following twistable CFROBOT cable types are currently available:

- Control cable (shielded and unshielded)
- Data and measuring system cables
- Fibre Optic Cables
- Motor and servo cables
- Bus cables
- Hybrid cables

We can also offer you chainflex® CFROBOT cables pre-harnessed with the connectors of your choice as a readycable®, or as a ready-to-install readychain® system.

chainflex® CFROBOT5

Fibre Optic Cable | TPE

36 10,000,000
Cycles guaranteed

10 x d
Bend radius e-chain®

±180°/m
Torsion angle

- For torsion applications
- TPE outer jacket
- Oil and bio-oil-resistant
- UV-resistant

- Low-temperature-flexible
- Hydrolysis and microbe-resistant
- PVC and halogen-free

Dynamic information

Bend radius	flexible twisted	minimum 10 x d
	fixed	minimum 5 x d
Temperature	flexible twisted	-25°C up to +80°C
	fixed	-55°C up to +80°C (following DIN EN 50305)
v max.	twisted	180°/s
a max.	twisted	60°/s ²
Travel		Robots and 3D movements, Class 1
Torsion		Torsion ±180°, with 1 m cable length, Class 3

Cable structure

Conductor	50/125µm, 62.5/125µm bending-resistant solid glass fibre optic cores, with aramid strain relief elements.
Core structure	FOC cores wound with high-tensile aramid dampers around a glass-fibre reinforced plastic central element.
Core identification	► Product range table
Outer jacket	Low-adhesion, extremely abrasion-resistant and highly flexible TPE mixture, adapted to suit the requirements in e-chains®. Colour: jet black (similar to RAL 9005)

Properties and approvals

UV resistance	High
Oil resistance	Oil-resistant (following DIN EN 60811-404), bio-oil-resistant (following VDMA 24568 with Plantocut 8 S-MB tested by DEA), Class 4
Silicone-free	Free from silicone which can affect paint adhesion (following PV 3.10.7 - status 1992)
Halogen-free	Following DIN EN 60754
UL Verified	Certificate no. B129699: "igus 36-month chainflex cable guarantee and service life calculator based on 2 billion test cycles per year"
REACH	In accordance with Regulation (EC) No. 1907/2006 (REACH)
Lead-free	Following 2011/65/EC (RoHS-II/RoHS-III)

Example image

Class 6.1.4.3

According to ISO Class 1. The outer jacket material of this series complies with CF9.15.07 - tested by IPA according to standard DIN EN ISO 14644-1 Following 2014/35/EC

In accordance with the valid regulations of the United Kingdom (as at 08/2021)

Guaranteed service life (details ► Page 188)

Cycles*	5 million	7.5 million	10 million

Technical note on bus cables

chainflex® bus cables have been specially developed and tested for continuously moving use in e-chains®. Depending on the material used for the outer jacket and on the underlying construction principle, the bus cables are designed for different mechanical requirements and resistance to diverse media. The cables have been electrically designed in such a way that, on the one hand, the electrical requirements of the respective bus specification are reliably met and, on the other, that greater value is placed on a high degree of EMC reliability. It is also ensured that the electrical values remain stable over the long term in spite of permanent movement. The overall quality of transmission in a complete bus communication system, however, is not solely dependent on the cable used. What is also essential is that all components (electronic parts, connecting system and cable) are precisely matched to each other and that the maximum transmission lengths, which are dependent on the respective system, are adhered to with regard to the data transmission rates needed. A cable is thus not solely responsible for the reliable transmission of signals. igus® advises you when you are designing your bus system to take all these factors into account and, with extensive tests, helps you to ensure the process reliability of your system from the very beginning.

CFROBOT® cables used in robots for the automated systems in fuel tank production. These are supplied as fully harnessed readychain® systems.

Harnessed standard dress packs for welding robots. The packages consist of a triflex[®] R e-chain[®], filled with chainflex[®] cables and hoses for the supply of energy, data and media. Users have the option of having the cables harnessed with connectors suitable for 24 manufacturer standards. The dress packs allow a quick replacement of the energy supply.

readychain[®] Robot

Ready-to-install harnessed e-chain systems[®] for robots

Harnessed energy supply systems, connectors and cables from igus[®].
Everything from one source. Directly from the manufacturer.

readychain[®] for axis 7

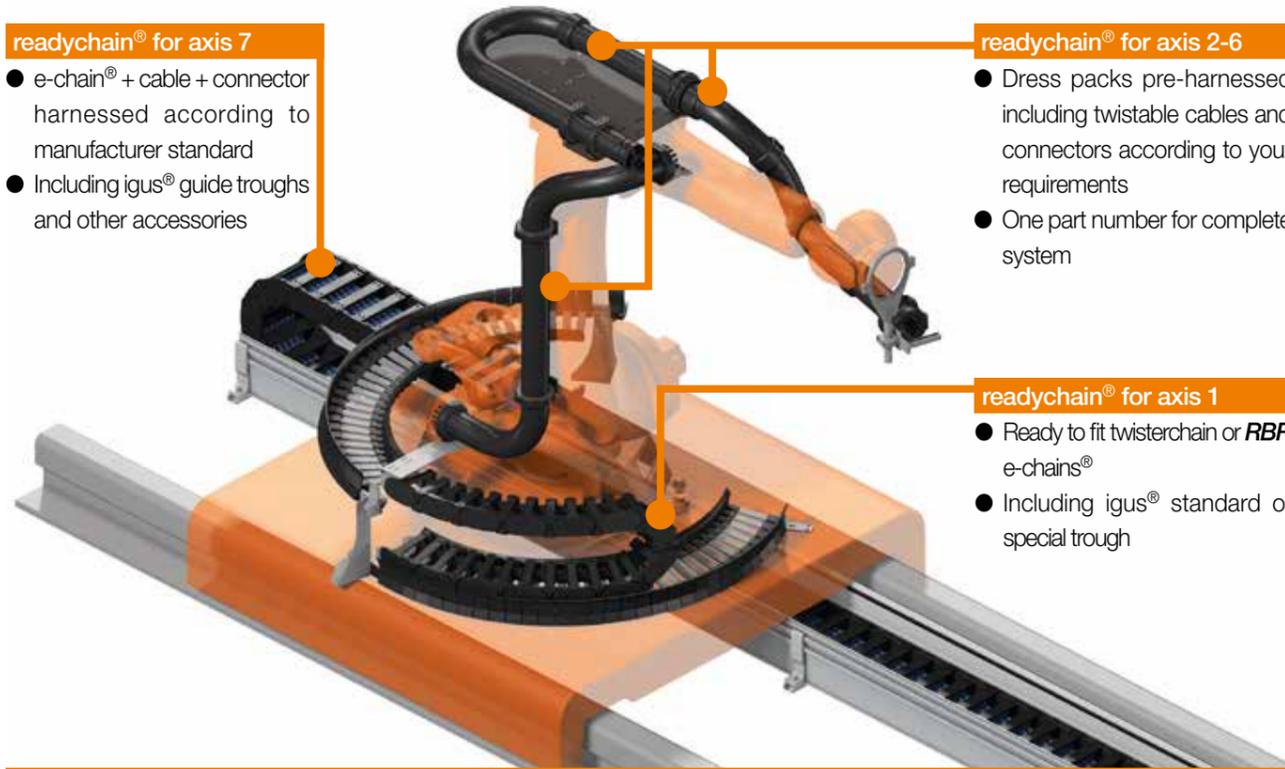

- e-chain[®] + cable + connector harnessed according to manufacturer standard
- Including igus[®] guide troughs and other accessories

readychain[®] for axis 2-6

- Dress packs pre-harnessed including twistable cables and connectors according to your requirements
- One part number for complete system

readychain[®] for axis 1

- Ready to fit twisterchain or *RBR* e-chains[®]
- Including igus[®] standard or special trough

Additional services for you

- Survey of existing systems on your robot by our sales engineers
- Optional system guarantee
- Worldwide readychain[®] specialists and 11 production sites for fast maintenance and spare part support

Energy supply for robots made easy online: around 1.5 million configuration options for energy supply components on a robot

The QuickRobot robot equipment configurator from igus[®] contains around 1.5 million configuration options for around 500 robot models. Find the right parts in seconds by entering just the robot manufacturer and model. The required e-chain[®] size can be selected by diameter. The required e-chain[®] size can be selected by diameter.

More information ► www.igus.eu/quickrobot

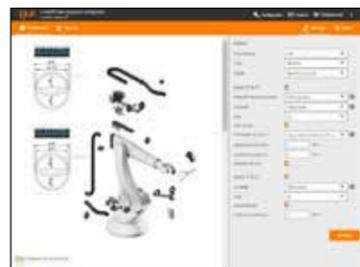

All igus[®] robotic components are tested in our laboratory and have already been used reliably in many applications for many years. Our goal is to ensure that the whole energy supply on your robots is reliable. We do not simply focus on mechanical protection but instead look at the entire application including the cables that have also been especially developed for use on the robot. We will gladly find a solution for your application and look forward to receiving your enquiry.

We are always happy to visit you on site and show you the advantages of the modular igus[®] robot equipment kit.

Product range dress packs for welding robots	
Product range	Dress pack
Part No.	

Welding axis 1-3

(1 m projection/side + 1 m e-chain[®] for each)

RRC.S.001

Consisting of:

- 1m TRLF.85.135.0, including mounting brackets
- Welding cable (2x35mm² + 1x25mm²) including multicontact TSB and TSS welding connector
- Control cable (18x0.75mm² + 5x0.75mm²) including rectangular connector on both ends
- Welding control cable (5x2x0.5mm²) including rectangular connector on both ends
- 3x hoses - DN12 red, green, blue - including fixture at both ends

Welding axis 3-6

(1 m projection/side + 1 m e-chain[®] for each)

RRC.S.002

Consisting of:

- 1m TRC.85.135.0 including protectors and mounting brackets
- Welding cable (2x35mm² + 1x25mm²) including multicontact TSB and TSS welding connector
- Control cable (18x0.75mm² + 5x0.75mm²) including round connector and rectangular connector
- Welding control cable (5x2x0.5mm²) including rectangular connector on both ends
- 3x hoses - DN12 red, green, blue - including fixture at both ends

 igus® GmbH defines cable length as entire length including connectors or open harnessing.

igus® readychain®

Ready-to-install harnessed e-chain systems® for robots

Assembled energy supply systems, connectors and cables from igus®. Everything from one source, directly from the manufacturer, delivered quickly to your machine

Ready-to-install systems, from connectors through assembled cables up to complex energy supply modules, delivered in 1-10 days

Customer-specific production

From one off to mass production

readychains® - increase your capacity and cash flow quickly with igus®

- Reduce overhead costs
- Reduce your throughput times from days to hours
- Respond flexibly to order variations
- Utilise igus® manufacturing capacities and our know-how in cable assembly

Reduce the number of suppliers and orders by 75%

- One order, one invoice, one delivery
- A partner for minimal machine downtimes
- All readychain® components are subjected to extensive quality checks and function tests

readychain®

You decide, igus® delivers

Industrially harnessed energy chain modules direct from the manufacturer ... You decide the quantity, the travel and the degree of harnessing ...

3 Benefits: readychain® basic

- 1 ONE supplier - combine all component suppliers
- 2 Reduce assembly time
- 3 Reduce failures

Reduction of assembly time
Reduction of logistics cost
Procurement optimisation

Further information, videos, configurators and product finders
► www.igus.eu/RCbasic

6 Benefits: readychain® standard

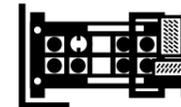

- 4 No electrical termination needed
- 5 100% digitally tested
- 6 No cable surplus

Reduction of assembly time
Reduction of logistics cost
Procurement optimisation

Further information, videos, configurators and product finders
► www.igus.eu/RCstandard

9 Benefits: readychain® standard+

- 7 Reduce interfaces
- 8 Optimise connections/interfaces
- 9 Ready-to-install multi-axis system

Reduction of assembly time
Reduction of logistics cost
Procurement optimisation

Further information, videos, configurators and product finders
► www.igus.eu/RCstandard+

13 Benefits: readychain® premium

- 10 Optimise your transport / assembly
- 11 One single assembly
- 12 One Part No. / Product group
- 13 Plug & Play

Reduction of assembly time
Reduction of logistics cost
Procurement optimisation

Further information, videos, configurators and product finders
► www.igus.eu/RCpremium

igus® readychain®

The igus® readychain® factory

Up to 1,600 readychain® systems per week, over 4,700m² floor space, "chain-cable-guarantee" since 1989. 3 shifts, 24 project engineers, 359 employees just for assembly

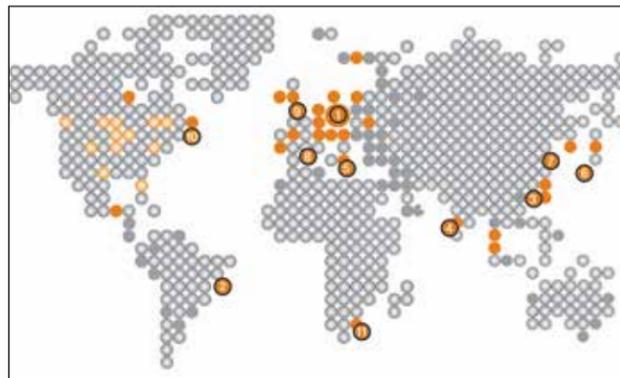

In the igus® readychain® factory, we assemble customised e-chain systems®.

Up-to-date production processes, custom-build or serial production

Full service from system acceptance to installation

12 readychain® factories worldwide

Customised cable assembly

readychain® rack system

Modular, quick and ready to install

1 Everything from one source

The readychain® system includes pre-assembled, customised e-chain systems®. The "Plug & Play" solutions are configured, manufactured and delivered according to individual customer specifications. The use of the mounting rack can yield benefits even at low quantities.

2 Flexible components

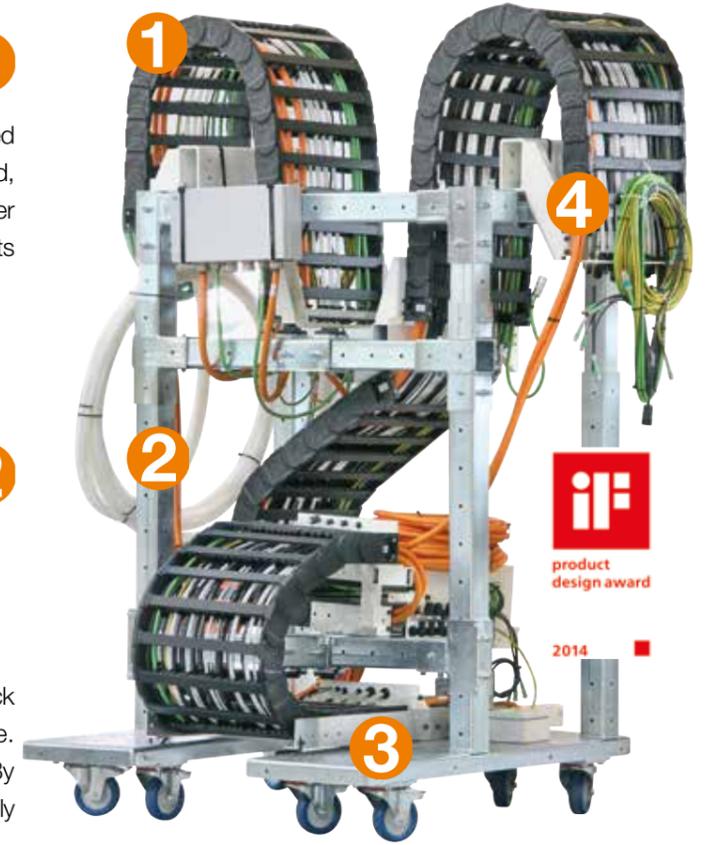

The telescopic supports and braces of the readychain® rack allow flexible adaptation to the installation needs on site. Changes in serial production can be undertaken easily. By using modular parts, additional components can also be easily attached to the rack.

3 Sustainable use

The components of the readychain® rack are galvanised and thus designed for a long life. Each rack can be constructed within a few hours. The individual elements can be reused at any time removing the need to dispose of custom made parts, such as conventional welded transport racks.

4 Precise fitting "Plug & Play"

All interfaces and attachments are designed in such a way that the installation of the e-chain® can be managed quickly and easily. The complete package includes the matching plugs and connectors, plates, sensor actuator boxes, linear bearings, links to the central lubrication etc., all reducing the installation time considerably.

80% savings during prototyping. Assembly transport rack for ready-to-install energy supply systems.

igus® readychain®

Connectors, cables and accessories

igus® connectors

Round connector kit

Square connector kit

Tools and accessories

igus® readycable®

4,600 drive cables suitable for 24 manufacturers, in 7 cable qualities

Catalogue standards: video-/vision-/bus technology

Catalogue standards: network/ethernet/FOC/Field bus

Catalogue standards: CF.INI initiator cables up to 4 x d

igus® hoses and attachments

Configured online with hose cable configurator

readychain®

Configured, fitted, with system guarantee

1

readychain® service

- We visit you
- Define interfaces
- Logistics planning
- Cycle integration
- Time schedule

System acceptance on your machine

2

readychain® service

- Component selection
- Interface optimisation
- Documentation
- Integrated project management
- Cost optimisation

Project planning

3

readychain® Skype service*

- Initial acceptance from your work place
- Build your prototype with an igus® project engineer, live in your meeting
- Your requests for changes explained with a model or visit us for production acceptance

*Only available in Germany

Prototype including transport rack

4

readychain® installation

- System installation by igus® specialists
- igus® supervision service for your own installation
- Transparent, fixed price

Installation on site

igus® readychain®

Ready to install harnessed e-chain systems® for robots

Capacity for 600,000 assembled cables a year, more than 18,000 test programmes, 1,800 test adapters

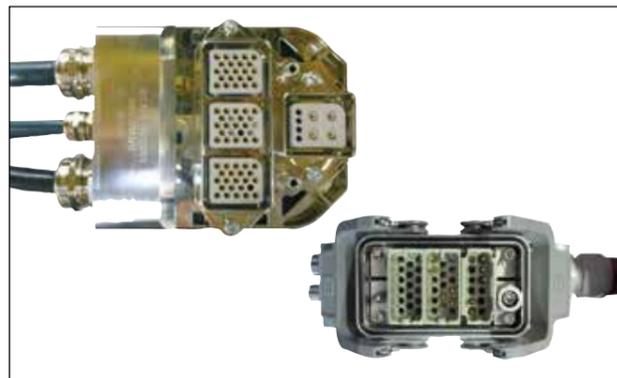

Process reliability - crimp forces monitored, automated and time-optimised

Computer-based high-voltage testing and inspection of all assembled cables

Modern machinery - automatic stripper-crimper

Special cable assemblies to your specifications

Unique guarantees for e-chains® and chainflex® cables

readychain®

igus® - everything from stock

In our warehouse the material waits for your order and not your order for the materials!

igus® warehouse for e-chains®:

100,000 e-chain® components ... hundreds of metres of guide troughs ... numerous strain relief solutions

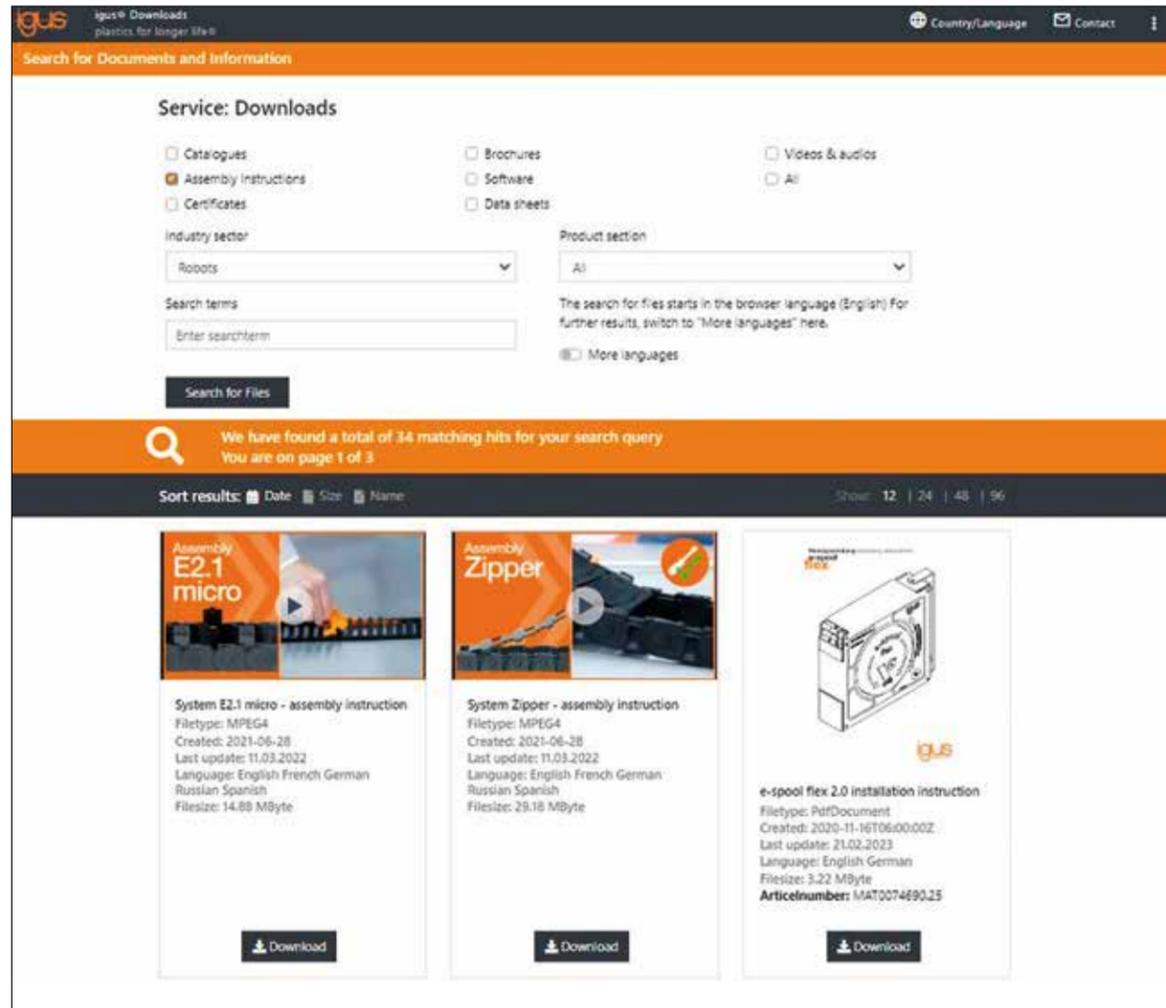

igus® warehouse für chainflex® cables:

5 million metres of cable ... 3,800m² test lab with more than 15,000 tests every year ... more than 8,000 cables per week

igus® warehouse for harnessing:

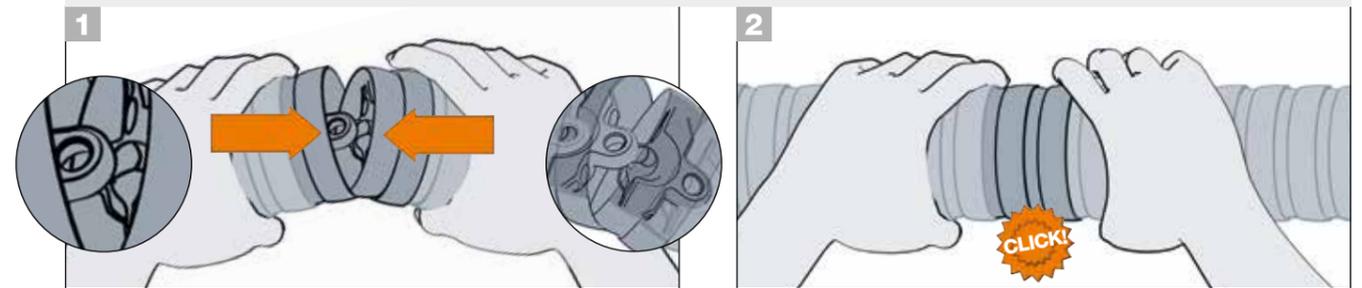

5,000 connector components ... everything ready for use immediately ... just-in-time

You can also find installation instructions and assembly videos online, in the igus® service and download area ► www.igus.eu/downloads

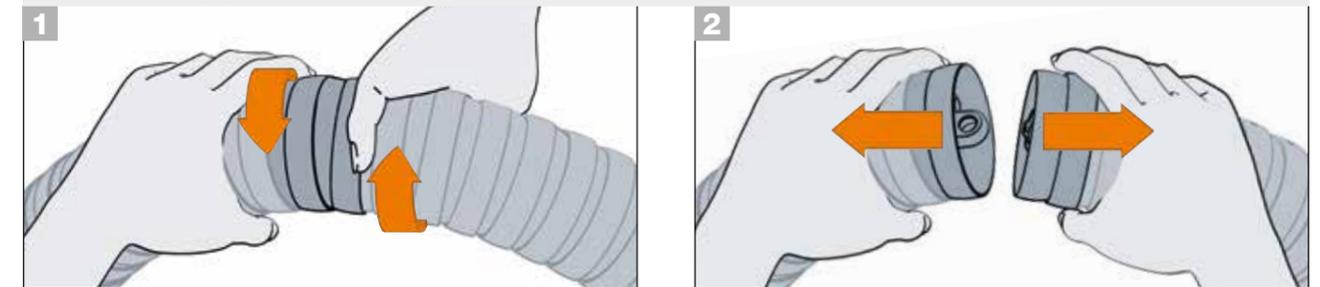

Joining | TRC.30 · TRC.40 · TRC.50 · TRC.60 · TRC.70 · TRC.85 · TRC.100

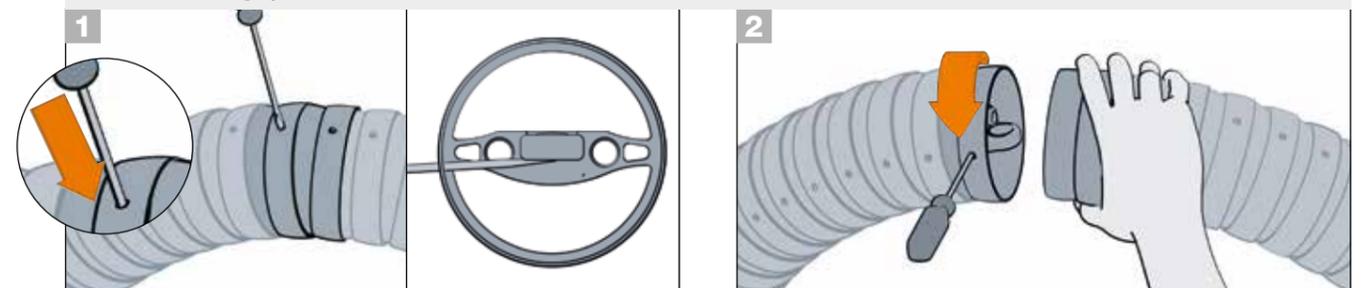

Engage the e-chain® links on the lower side. Use the chamfered side of the ball to open the socket and click together.

Disassembly | TRC.30 · TRC.40 · TRC.50 · TRC.60

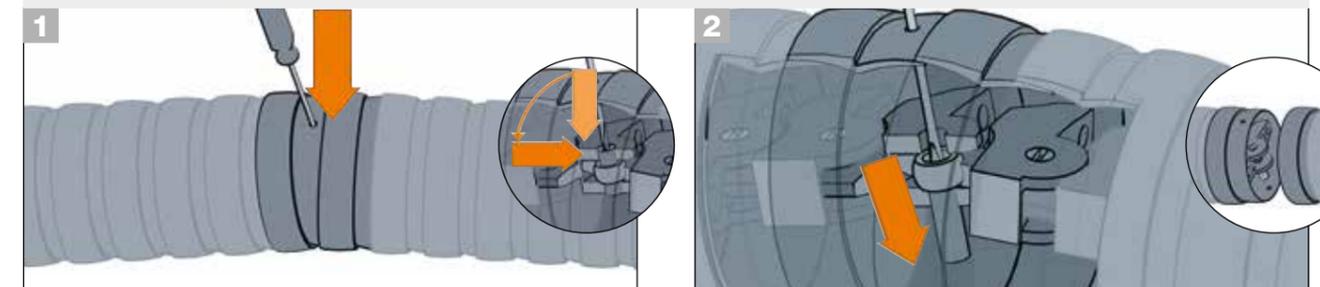

To disassemble the triflex® R TRC.30, TRC.40 and TRC.60, move it to the bend radius stop-dog and turn anti-clockwise.

Disassembly | TRC.70 · TRC.85 · TRC.100

Bend the e-chain® into the radius, press into the opening with the screw contour with a screwdriver (predetermined breaking point), insert approx. 5mm between the ball and socket and use this as a lever arm to lever it counter-clockwise.

Disassembly | TRC.125

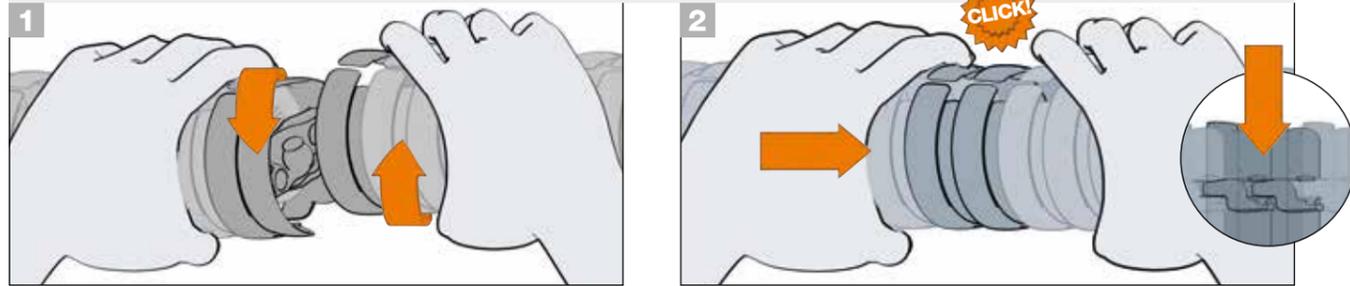

Align the e-chain® with the igus® logo downwards. Unlock the bolt from above with a slotted screwdriver by turning it 90° and push it down. Then push the e-chain® links apart without exerting force.

triflex® R TRE.B

Assembly instructions

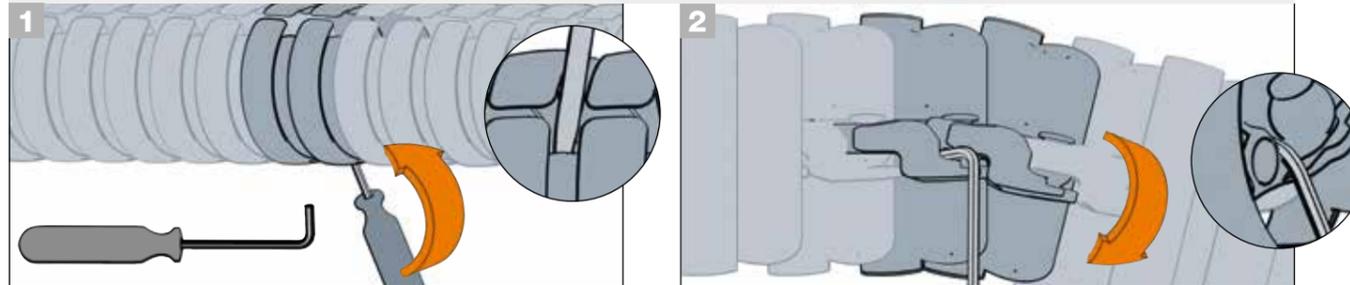

Joining | TRE.B

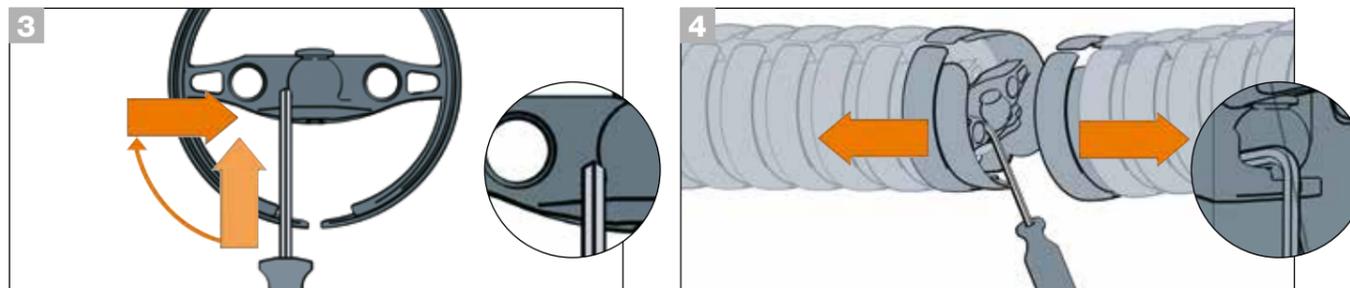

Guide the e-chain® links together at the lower radius stop-dog and push the socket over the ball by turning it slightly. Snap the ball into place by pressing the socket with an audible "click".

Disassembly | TRE.B

Insert the dismantling tool into the e-chain® from below.

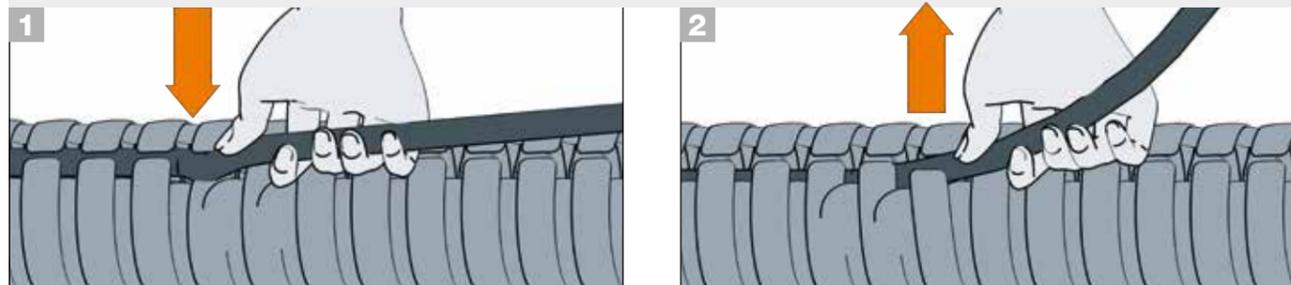

Hook the tool between the ball and socket from the front.

Insert the tool next to the ball and socket and turn the e-chain® 45° counter-clockwise.

After the socket has been lifted above the ball, the e-chains® links can be separated by twisting them slightly.

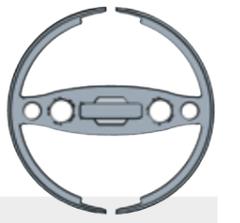

Filling / removing | TRE.B

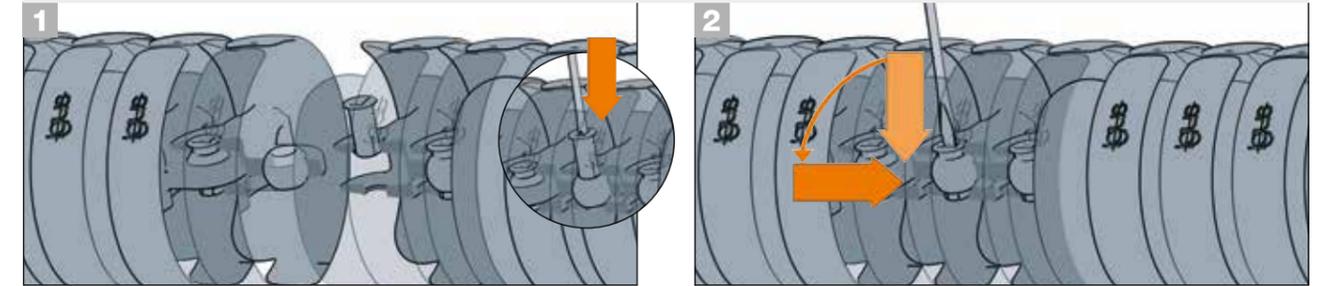

Easy filling with "easy" design - simply press in ... or pull out cables.

triflex® R TRE.C

Assembly instructions

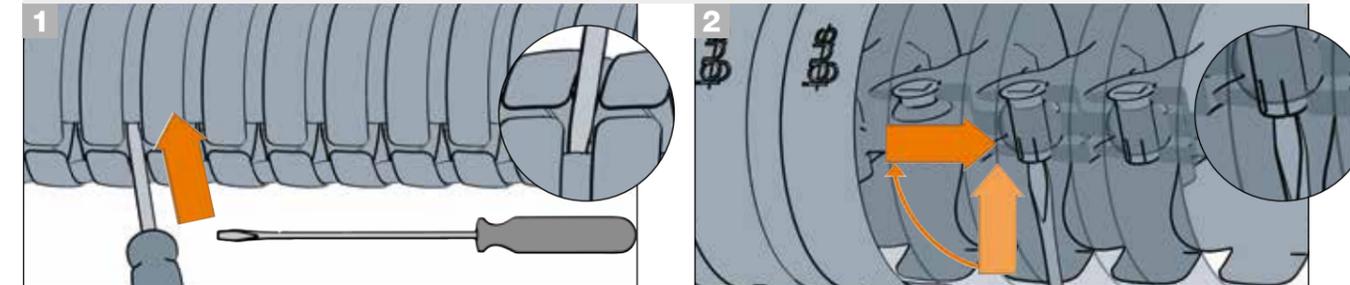

Joining | TRE.100.C · TRE.125 · TRC.125

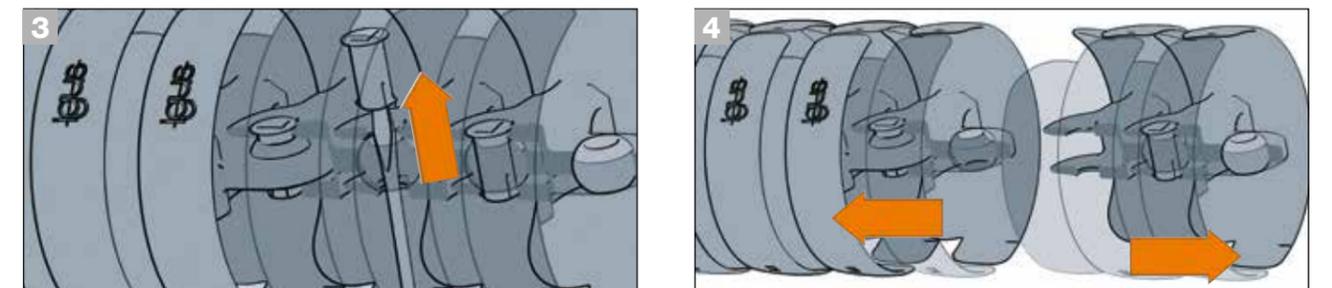

Join the e-chain® links together, push in the bolt with a screwdriver. Lock the bolt with a 90° turn.

Disassembly | TRE.C

Insert the slotted screwdriver through the "easy" slot in the middle of the e-chain®.

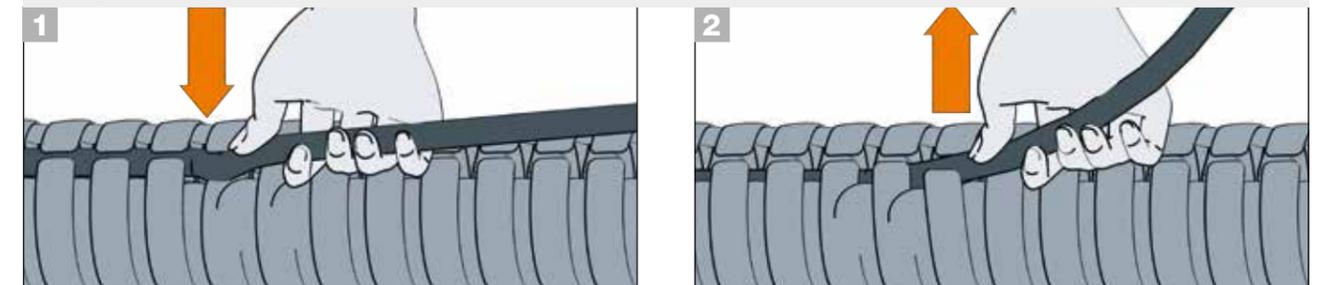

Unlock the bolt by turning it 90°.

Push the bolt through.

Push e-chain® links apart without exerting any force.

Filling / removing | TRE.C

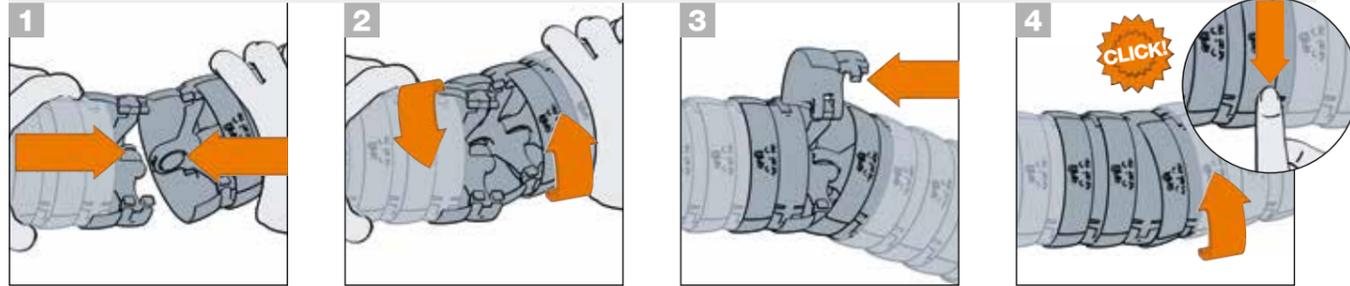

Easy filling with "easy" design - simply press in ... or pull out cables.

triflex® R TRCF

Assembly instructions

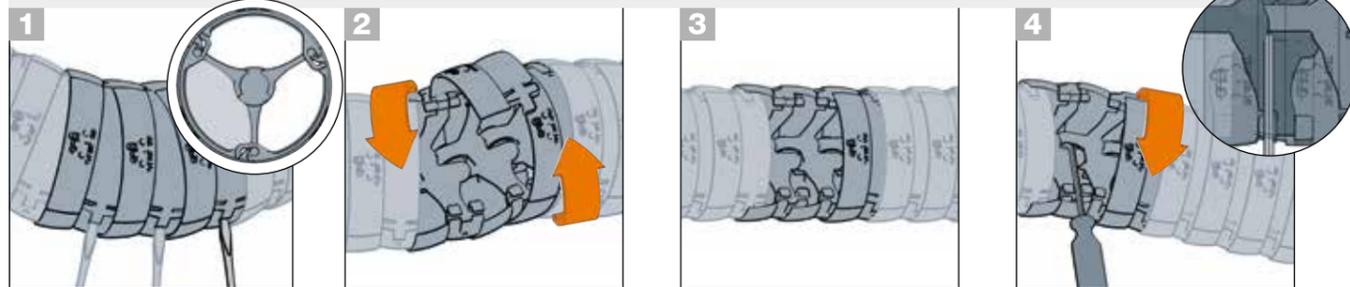

Joining | TRCF

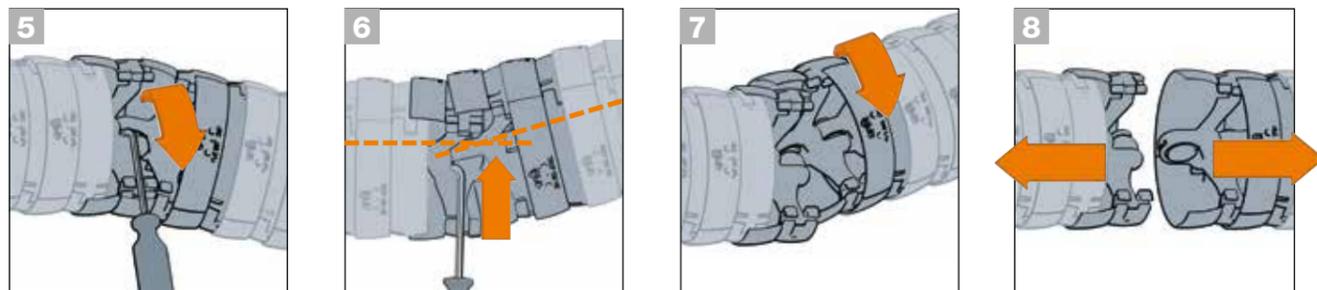

Put the e-chains® parts at an angle and push them firmly together.

To close, simply push the open chain link shut.

Disassembly | TRCF

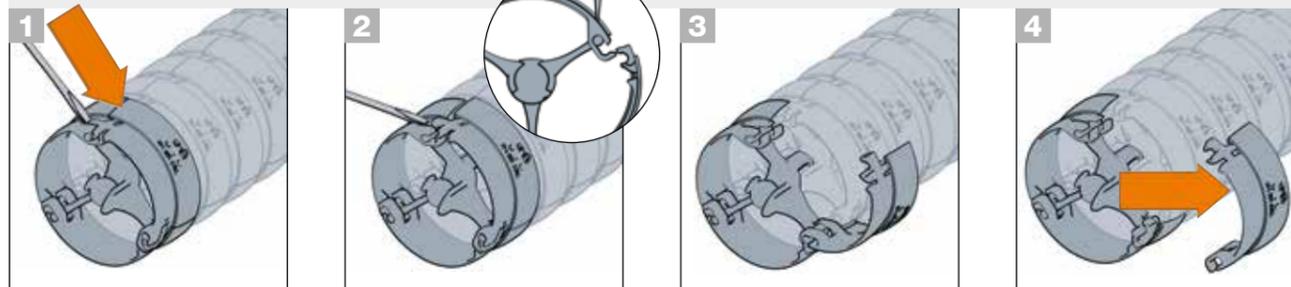

Using a screwdriver on three e-chain® links, unlock the lid at the marked segment. Then swing open the two lids by slightly twisting the e-chain® links towards each other. Insert the dismantling tool between the ball and socket.

Then lever the socket over the ball by twisting the e-chain® links against the stop-dog of the dismantling tool. Bend the e-chain® slightly, then twist and pull apart.

Open | TRCF

Open the lids with a screwdriver

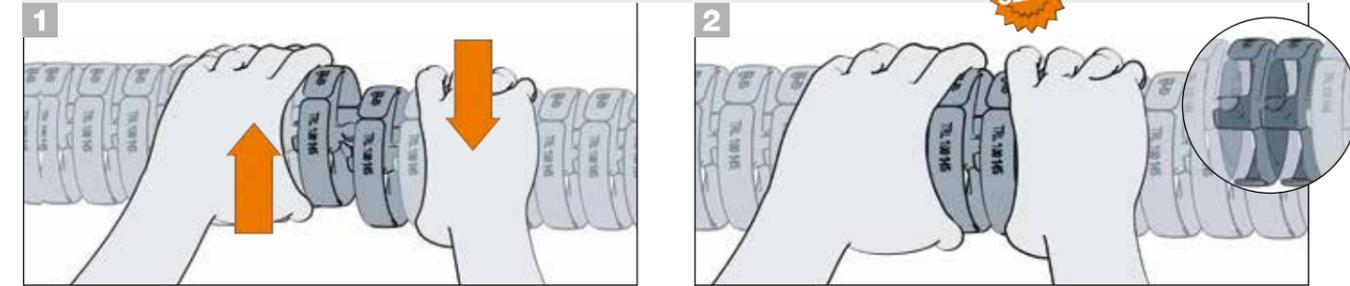

The lids can then be removed if desired in the open state.

triflex® R TRL

Assembly instructions

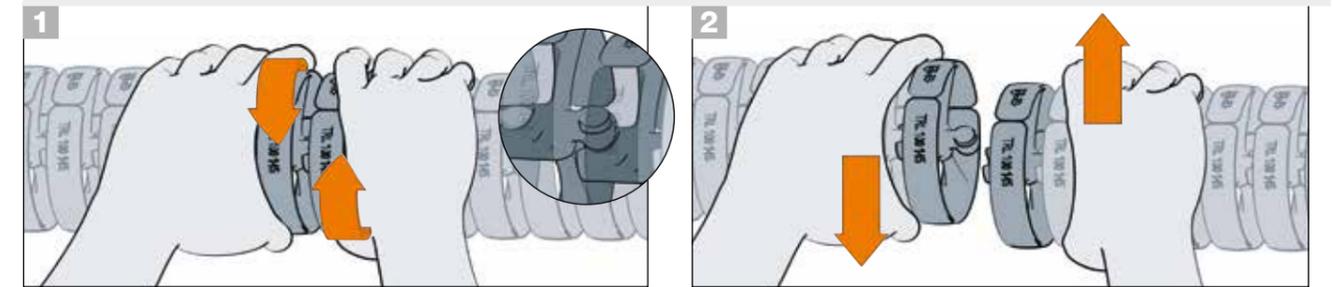

Joining | TRL

Place the ball with the round side over the socket.

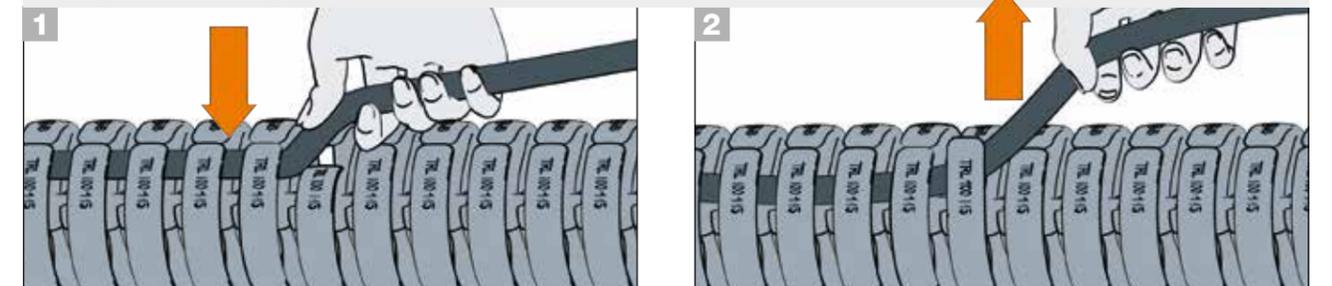

Push the ball into the socket ...

Disassembly | TRL

Slightly twist the e-chain® links towards each other and push the ball sideways out of the socket.

Filling / removing | TRL

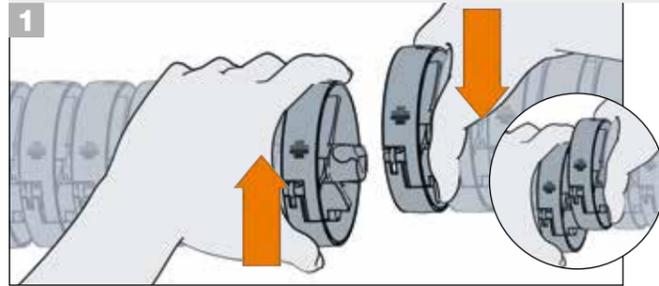

Easy filling with "easy" design - simply press in ... or pull out cables.

triflex® R TRLF

Assembly instructions

Joining | TRLF

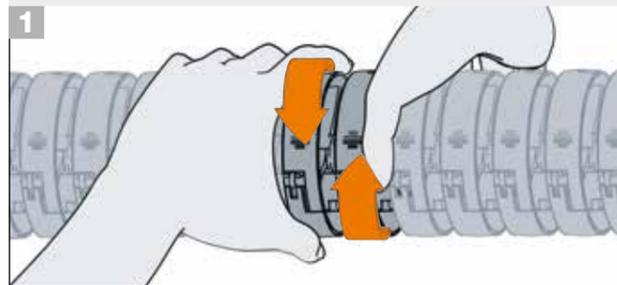

Place the ball with the round side over the socket.

Push the ball into the socket.

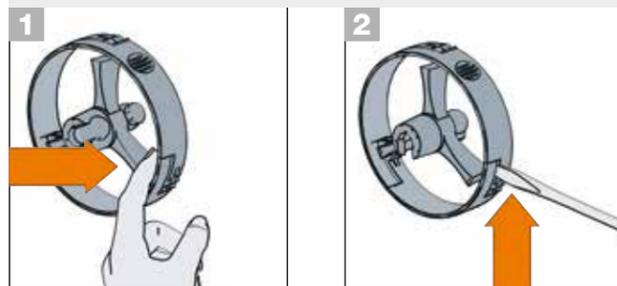

Disassembly | TRLF

Slightly twist the e-chain® links towards each other and push the ball sideways out of the socket.

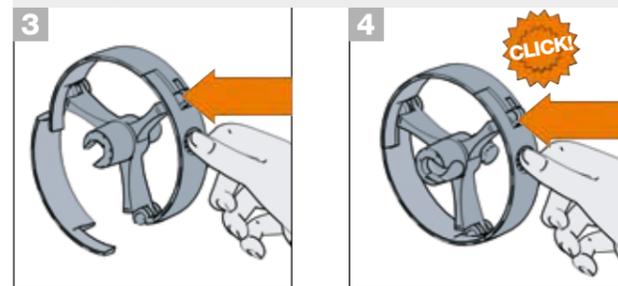

Open | TRLF

To open, pull up a lid by hand or insert a screwdriver into the notch and lever open.

Close | TRLF

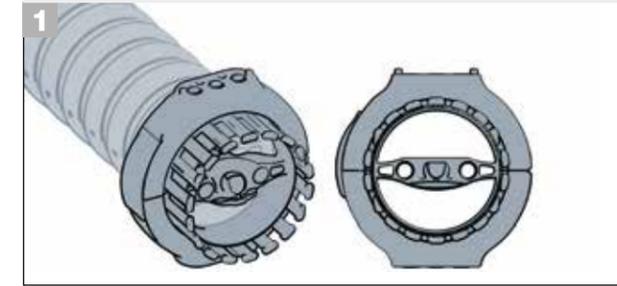

To close - push by hand until you hear a "click".

triflex® R assembly

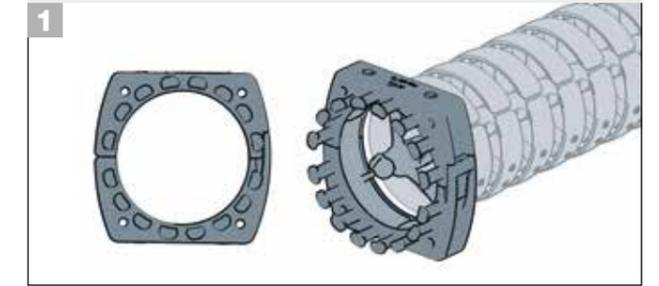

Installation Instructions - Mounting Brackets & Assembly Tools

Open | Standard mounting brackets

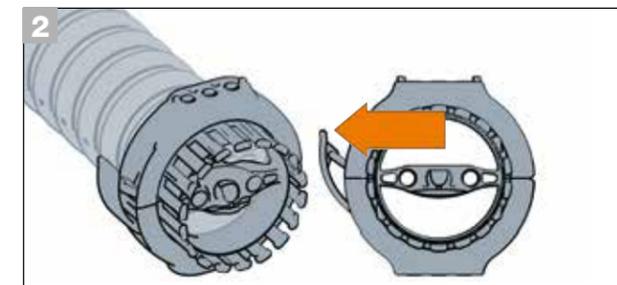

Standard mounting brackets can be opened without tools.

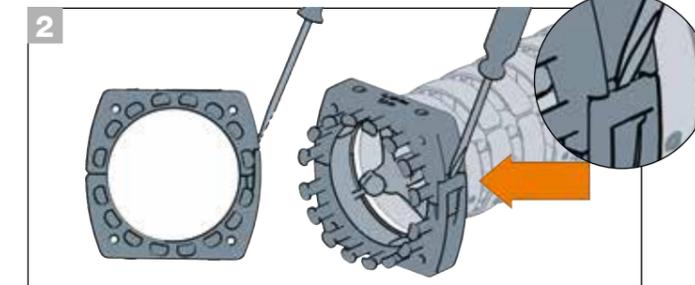

Open | Light mounting brackets

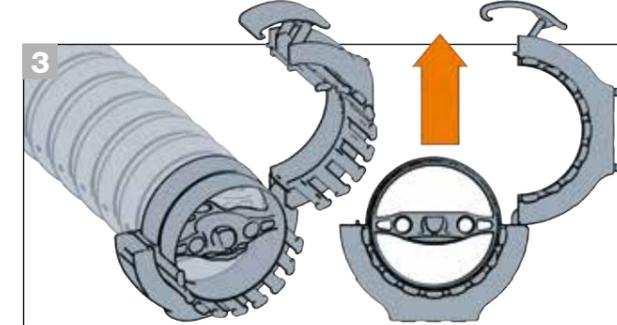

The light mounting brackets can simply be opened with a flat-head screwdriver.

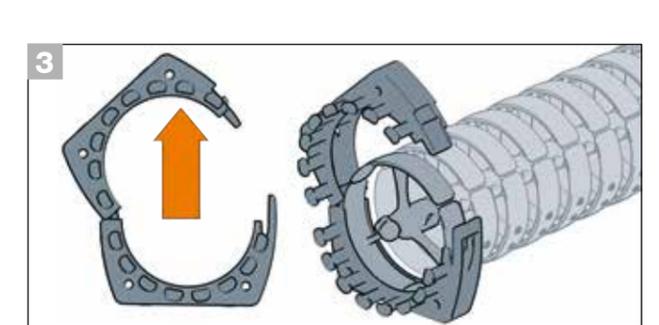

Open the lock without tools by loosening the clamping lever.

Unlock the internal plastic nose with a screwdriver.

Open the mounting bracket and remove the e-chain®

Open the mounting bracket and remove the e-chain®

Note: triflex® R series TRE, TRE.B - TRE.LOCK clips ensure a secure fit in the mounting bracket. Supplied with every mounting bracket.

Which tool do I need for disassembly for which series?

Easy-to-use disassembly tools for triflex® TRE (B version) and TRCF. Easy disassembly at any point along the e-chain®, even when full.
